Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR CODEBOOK NOTES

1) The rates in this dataset represent three year moving averages of total violent victimization which includes attempted and completed rapes, robberies, aggravated assaults, and simple assaults. The decision to use three year moving averages was made by the principal investigators so that estimates for smaller subgroups would be reliable and the trends would be comparable. Two year averages are used for the endpoints of the time series.

2) Users should be aware that some of the original data sources have been deaccessioned and are no longer available from ICPSR. ICPSR 4451 has been replaced by ICPSR 22746; ICPSR 4276 has been replaced by ICPSR 22900; ICPSR 3995 has been replaced by ICPSR 22901.

3) Users should refer to the project's final technical report (Lauritsen and Heimer, 2009; NCJ 229133) for additional information on the study methodology, weighting, and rate estimation procedures.

4) Detailed information about the National Crime Survey (NCS) and the National Crime Victimization Survey (NCVS) is available through the National Crime Victimization Survey Resources Guide .

5) ICPSR recoded blanks in numeric variables to -9 and labeled them Blank.

Gender and Violent Victimization, 1973-2005 [United States]

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
