BIBLIOGRAPHIC CITATION

Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

Ann Arbor, MI: Inter-university Consortium for Political and Social Research [distributor], 2001.

REQUEST FOR INFORMATION ON USE OF ICPSR RESOURCES

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data were used.

DATA DISCLAIMER

The original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

DATA COLLECTION DESCRIPTION

Eric D. Wish, Thomas Gray, and Jonathan Sushinsky

EXPERIMENT TO ENHANCE THE REPORTING OF DRUG USE BY ARRESTEES IN CLEVELAND, DETROIT, AND HOUSTON, 1997 (ICPSR 2890)

SUMMARY: This project involved an experiment conducted in three Drug Use Forecasting (DUF) [DRUG USE FORECASTING IN 24 CITIES IN THE UNITED STATES, 1987-1997 (ICPSR 9477)] program sites to determine whether using a more detailed informed consent procedure and/or altering the sequence of the interview and urine specimen collection could enhance the validity of arrestees' self-reports of drug use without adversely affecting study response rates. A 2x2 factorial design was used to assess the effects of the two manipulations. The first two experimental conditions involved administering either the standard DUF informed consent or an enhanced consent that told the arrestees more about the confidential nature of the research and the capabilities of urinalysis. The second two conditions involved collecting the urine specimen either before or after the interview was administered. The experiment included 2,015 adult arrestees from Cleveland, Ohio, Detroit, Michigan, and Houston, Texas, who were randomly assigned to one of the four experimental conditions. The experiment was designed so that the only variability across the interviews was the manipulation of informed consent and the sequencing of the urine specimen request. All other procedures of a standard DUF collection were followed. Data were collected in Cleveland between July 8 and August 22, 1997, in Detroit from August 4 to September 27, 1997, and in Houston from October 17 to November 1, 1997. Variables specific to this project include the experimental condition to which the respondent was assigned, follow-up questions asking whether the arrestee would have responded differently if assigned to the other conditions, and several dummy variables on length and type of drug use. Data from the DUF interview provided detailed information about each arrestee's self-reported use of 15 drugs. For each drug type, arrestees were asked whether they had ever used the drug, the age at which they first used the drug, whether they had used the drug within the past three days, how many days they had used the drug within the past month, whether they had ever needed or felt dependent on the drug, and whether they were dependent on the drug at the time of the interview. Data from the DUF interview instrument also included alcohol/drug treatment history, information about whether arrestees had ever injected drugs, and whether they were influenced by drugs when the crime that they were charged with was committed. The data also include information about whether the arrestee had been to an emergency room for drug-related incidents and whether he or she had had prior arrests in the past 12 months. Urine tests screened for the presence of ten drugs, including marijuana, opiates, cocaine, PCP, methadone, benzodiazepines (Valium), methaqualone, propoxyphene (Darvon), barbiturates, and amphetamines (positive test results for amphetamines were confirmed by gas chromatography). Demographic data include the age, race, sex, educational attainment, marital status, employment status, and living circumstances of each respondent.

UNIVERSE: Booked adult arrestees in Cleveland, Detroit, and Houston in 1997.

SAMPLING: Sites were chosen to represent different interviewing conditions and to fit with the experiment's data collection schedule.

NOTE: (1) Users are encouraged to review the documentation for the 1997 DUF data collection for the methodology and sampling used for the standard DUF interview protocol. (2) The user guide and the codebook and data collection instruments are provided by ICPSR as Portable Document Format (PDF) files. The PDF file format was developed by Adobe Systems Incorporated and can be accessed using PDF reader software, such as the Adobe Acrobat Reader. Information on how to obtain a copy of the Acrobat Reader is provided on the ICPSR Web site.

RESTRICTIONS: The data are restricted from general dissemination. Users interested in obtaining these data must complete a Data Transfer Agreement Form and specify the reasons for the request. A copy of the Data Transfer Agreement Form can be requested by calling 800-999-0960 or 734-998-9825. The Data Transfer Agreement Form is also available as a Portable Document Format (PDF) file from the NACJD Web site at http://www.icpsr.umich.edu/NACJD/Private/private.pdf. Completed forms should be returned to: Director, National Archive of Criminal Justice Data, Inter-university Consortium for Political and Social Research, Institute for Social Research, P.O. Box 1248, University of Michigan, Ann Arbor, MI 48106-1248, or by fax: 734-998-9905.

EXTENT OF COLLECTION: 1 data file + machine-readable documentation (PDF) + SAS data definition statements + SPSS data definition statements

EXTENT OF PROCESSING: REFORM.DATA/ REFORM.DOC/ SCAN/ UNDOCCHK.ICPSR/ MDATA.ICPSR/ CDBK.ICPSR/ DDEF.ICPSR/ MDATA.PR

DATA FORMAT: Logical Record Length with SAS and SPSS data definition statements

File Structure: rectangular
Cases: 2,015
Variables: 359
Record Length: 1,127
Records Per Case: 1

(AVAILABLE IN PDF VERSION ONLY)

*** ICPSR CODEBOOK NOTES ***

(1) The data contain 2,015 cases but the project reports were based on 2,009 cases. The variable SCRIPT records the experimental condition assigned to the interviewee. It has six cases coded as 9 which was unlabeled in the original file but designated as a missing value.

(2) ICPSR recoded system missing to a 9-series code, labeled the code as "Unknown," and declared it as a missing value. Other missing value designations were provided in the original file. Some of these missing values were not labeled but are also not present in the data. These missing value designations were retained in the SAS and SPSS data definition statements.

(3) ICPSR was unable to verify value labels for some variables in this collection. For categorical variables, any undocumented values were labeled "Undoc code."

(4) Some continuous variables have high and low values that may fall outside the valid range for that variable. These values were not labeled because they may be valid. However, users of the data should be aware of the possibility that these values may not be valid.

(5) The exception to Note 4 above is the continuous variable STHRS. Code 50 is outside the valid range for this variable but has been labeled as "Undoc code." The 357 cases coded as 50 in STHRS correspond to cases coded 2 (Not Interviewed) in AGREERC and to cases coded 3 (Did not Agree or Provide) in AGREERC2.

(6) The date of the interview is provided in three variables of month, day, and year. The year is recorded as a two-digit value in the data. Users interested in using this variable for analysis will want to convert the year to a four-digit value. Users can use one of the following examples after the SPSS or SAS syntax files have been used to read the ASCII data file into SPSS or SAS, respectively. A display format is given but users can elect to use a format of their choice.

Example to convert to a MMDDYYYY format using SPSS:

```
compute newyr=intyr+1900.
compute intdate=date.mdy(intmo,intday,newyr).
format intdate (adate10).
```

Example to convert to a MMDDYYYY format using SAS:

```
newyr=intyr+1900;
intdate=mdy(intmo,intday,newyr);
format intdate mmddyy10.;
```

CODEBOOK FOR ICPSR 2890

EXPERIMENT TO ENHANCE THE REPORTING OF DRUG USE BY ARRESTEES
IN CLEVELAND, DETROIT, AND HOUSTON, 1997

PLEASE NOTE: The "M" between the code and the code label indicates the code has been designated as a missing value.

APPENDIX A

EXPERIMENTAL SCRIPTS

INTERVIEW #: __ __ __ __ __ DATE: __ __/__ __/__ __

INFORMED CONSENT A
(STANDARD CONSENT, INTERVIEW FIRST)

Hi, my name is _____ and I'm one of several researchers here at the jail today doing interviews with arrestees.

This interview is part of a federally funded study. Your participation is voluntary. The information you provide is confidential and anonymous. It will not help or hurt your case.

Would you agree to the interview? 1 2 3 4 _____

Now we need to get a urine sample from you. We're asking you for a urine sample for the purposes of planning services such as treatment. If you help us out with this, we'll give you a couple of candy bars.

Specimen: 0 1 2

(After specimen requested/collected...)
Thank you for participating in the research study. I have one last follow-up question about the interview:

If I had asked you for the urine first, would you still have done the interview?
No - 0 *(Finish)*
Yes - 1 *(Ask follow-up)*

If YES: Would your answers have been different?
No - 0 *(Finish)*
Yes - 1 *(Finish)*

INTERVIEW #: __ __ __ __ __ DATE: __ __/__ __/__ __

INFORMED CONSENT C
(ENHANCED CONSENT, INTERVIEW FIRST)

Hi, my name is _____ and I'm one of several researchers here at the jail today doing interviews with arrestees. I'd like to do an interview with you that will take around 10 minutes.

Your participation is voluntary. That means that you don't have to do this. The information you give us will be confidential and anonymous. Nothing that you tell me will be repeated to anyone and the answers you give me will be written on a form that doesn't have your name on it. Do you have any questions or concerns about confidentiality?

We received money from the government to do this research. But we don't work for the police, courts, or the jail. Your taking part in this study will not hurt your case, or help your case. Do you have any questions?

I'll ask you some things about your background, including questions about your use of different kinds of drugs. If there is any question that you don't want to answer, just tell me and we'll skip over it. I'd rather that you told me you didn't want to answer a question than to answer it untruthfully. Do you have any questions?

Will you do the interview? 1 2 3 4 _____

Now we've come to the last part of the interview. I need to get a urine sample from you. It'll be used to show the drugs you told me you used <u>or did not use</u> in the last three days. The results won't have your name on them and will be put together with the results of thousands of other tests. If you help us out with this, we'll give you a couple of candy bars. Do you have any questions?

Specimen: 0 1 2

(After specimen requested/collected...)
Thank you for participating in the research study. I have one last follow-up question about the interview:

INTERVIEW #: __ __ __ __ __ DATE: __ __/__ __/__ __

INFORMED CONSENT B
(STANDARD CONSENT, URINE FIRST)

Hi, my name is _____ and I'm one of several researchers here at the jail today doing interviews with arrestees.

This interview is part of a federally funded study. Your participation is voluntary. The information you provide is confidential and anonymous. It will not help or hurt your case.

Would you agree to the interview? 1 2 3 4 _____

First we need to get a urine sample from you. We're asking you for a urine sample for the purposes of planning services such as treatment. If you help us out with this, we'll give you a couple of candy bars. After that, we'll do a short interview that will take around 10 minutes.

Specimen: 0 1 2

(Collect specimen; or if declined specimen, proceed with interview. Ask follow up questions below <u>after</u> interview is completed.

If respondent initially declined to provide a urine specimen ask...

Now that you have completed the interview portion of the study, would you be willing to provide a urine specimen? No - 0 (Ask follow-up)
Yes - 1 (Collect, and ask follow-up)

Thank you for participating in the research study. I have one last follow-up question about the interview:

Would your answers have been different if I hadn't asked you for a urine sample? No - 0 *(Finish)*
Yes - 1 *(Finish)*
