REQUEST FOR INFORMATION ON USE OF ICPSR RESOURCES

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data were used.

DATA DISCLAIMER

The original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

SUMMARY

This study examined the ways in which the model of the Kings County Felony Domestic Violence Court (FDVC) changed the way cases were processed and adjudicated, the impact of this approach on outcomes, and its effects on recidivism. In order to evaluate the implementation and effectiveness of the FDVC, the researchers selected three samples of cases for collection of detailed data and comparisons on case characteristics, processing, and outcomes. First, felony domestic violence cases indicted from 1995 to early 1996 before the FDVC was established, and adjudicated by various parts of the state Supreme Court were studied. These pre-FDVC cases provided a comparison group for assessing differences associated with the FDVC model. Very few of these cases had felony protection order violations as the sole or top indictment charge, since they pre-dated the implementation of the expanded criminal contempt law that went into effect in September 1996. Second, a sample of cases adjudicated by FDVC in its early period (the first half of 1997, after the model was fully implemented) and similar in indictment charges to the pre-FDVC cases was selected. These were cases that had indictment charges other than, or in addition to, felony criminal contempt charges for protection order violations. In other words, these were cases that would have been indicted and adjudicated in the state Supreme Court even without application of the September 1996 law. Third, because the September 1996 law felonizing many protection order violations (under criminal contempt statutes) broadened the types of cases handled by the Supreme Court, compared with those handled in the Supreme Court prior to this law, an additional sample of cases adjudicated by the FDVC (beginning in the first half of 1997) was selected. This was a small sample in which felony protection order violations were the only indicted felony charges. These cases would not have been indicted on felonies during the pre-FDVC period, and so would have remained in the criminal courts as misdemeanors. The inclusion of this sample allowed the researchers to assess how the protection order violation cases were different from the general population of FDVC cases, and how they might be handled differently by the Court and partner agencies. These cases were designated "CC-only" because their only felony indictment was for criminal contempt, the law under which felony protection order violations were charged. Variables in Part 1, Recidivism Data, contain information on number of appearance warrants issued; days incarcerated for pre-disposition; number of appearances for pre-disposition and post-disposition; bail conditions (i.e., batterer treatment or drug treatment); top charge at arrest, indictment, and disposition; indications of defendant's substance abuse of alcohol, marijuana, or other drugs, and psychological problems; types of disposition and probation; months of incarceration; sentence conditions; history of abuse by defendant against the victim; length of abuse in months;

history of physical assault and sexual abuse; past weapon use; and medical attention needed for past domestic violence. Additional variables focus on whether an order of protection was issued before the current incident, whether the defendant was arrested for past domestic violence with this victim, total number of known victims, weapon used during incident, injury during the incident, medical attention sought, number of final orders of protection, whether the defendant was jailed throughout the pending case, number of releases during the case, number of reincarcerations after release, whether the victim lived with the defendant, whether the victim lived with children in common with the defendant, relationship between the victim and the defendant, number of months the victim had known the defendant, number of children in common with the defendant, whether the victim attempted to drop charges, whether the victim testified at trial, whether a victim advocate was assigned, total violations during pending case, pre-disposition violations, and number of probation violations. Demographic variables in Part 1 include defendant and victims' gender, race, victim age at defendant's arrest, defendant's income, employment status, and education. Variables in Part 2, Top Charge Data, relating to the defendant include number and types of prior arrests and convictions, top charge at arrest, severity of top charge at arrest, top charge at grand jury indictment, severity of top charge indictment, disposition details, Uniform Crime Reporting (UCR) arrest indicators, child victim conviction indicator, drug conviction indicator, weapon conviction indicator, types of probation, sentence, disposition, and offenses. Demographic variables in Part 2 include sex and race of the defendant.

PURPOSE OF THE STUDY

The Kings County Felony Domestic Violence Court (FDVC) in the borough of Brooklyn, New York, has been operating since June 1996. Its goals were to create an effective and coordinated response to felony domestic violence crimes by bringing together criminal justice and social service agencies, and to serve as a model for other communities across the state and nation. One of the key features of this court model was its emphasis on building partnerships between public and private sector community agencies to coordinate their work and achieve a common set of goals. The key agencies consisted of the court, the Center for Court Innovation, the Kings County District Attorney's Office Domestic Violence Bureau and Counseling Services Unit, Safe Horizon's Brooklyn Felony Domestic Violence Unit, the New York City Department of Probation, New York Forensics, Safe Horizon's Alternatives to Violence, and Treatment Alternatives to Street Crime. This study evaluated the implementation and effectiveness of the Kings County Felony Domestic Violence Court. The study examined questions about how the model of FDVC had changed the way cases were processed and adjudicated, the impact of this approach on outcomes, and its effects on recidivism.

METHODS

STUDY DESIGN

In order to evaluate the implementation and effectiveness of the Kings County Felony Domestic Violence Court, the researchers selected three samples of cases for collection of detailed data and comparisons on case characteristics, processing, and outcomes. First, felony domestic violence cases indicted from 1995 to early 1996, before the FDVC was established and adjudicated by various parts of the state Supreme Court, were studied. These pre-FDVC cases provided a comparison group for assessing differences associated with the FDVC model. Very few of these cases had felony protection order violations as the sole or top indictment charge, since they pre-dated the implementation of the expanded criminal contempt law that went into effect in September 1996. Second, a sample of cases adjudicated by FDVC in its early period (the first half of 1997, after the model was fully implemented) and similar in indictment charges to the pre-FDVC cases was selected. These were cases that had indictment charges other than, or in addition to, felony criminal contempt charges for protection order violations. In other words, these were cases that would have been indicted and adjudicated in the Supreme Court even without application of the September 1996 law. Third, because the September 1996 law felonizing many protection order violations (under criminal contempt statutes) broadened the types of cases handled by the Supreme Court, compared with those handled in the Supreme Court prior to this law, an additional sample of cases adjudicated by the FDVC (beginning in the first half of 1997) was selected. This was a small sample in which felony protection order violations were the only indicted felony charges. These cases would not have been indicted on felonies during the pre-FDVC period, and so would have remained in the criminal courts as misdemeanors. The inclusion of this sample allowed the researchers to assess how the protection order violation cases were different from the general population of FDVC cases, and how they might be handled differently by the Court and partner agencies. These cases were designated "CC-only" because their only felony indictment was for criminal contempt, the law under which felony protection order violations were charged. The population of the sampled cases was identified by compiling four sources. First, cases were selected from the District Attorney's Office Management Information System, which catalogued cases identified as felony domestic violence in the Early Case Assessment Bureau from 1994 through 1997. Early explorations of this database showed that it included a number of cases that were not in fact domestic violence. This raised the troubling possibility that reliance on this as the sole source could exclude many domestic violence cases, if cases were also mistakenly excluded from the database. Reasons for possible exclusion were unknown, but the researchers feared that any systematic exclusion factors would lead to

biased sampling. Second, cases were identified from the District Attorney's Office Domestic Violence Bureau log book of pending felonies, a chronological record of felony cases recorded as victims came in to speak with a Domestic Violence Bureau Felony assistant district attorney about testifying before a grand jury. This source had the drawback of excluding cases in which the victim did not come in to prepare for the grand jury. In addition, upkeep of the book ceased partway through 1995. Third, cases were found in the District Attorney's Domestic Violence Bureau trial list of open felony cases that was updated two to three times per week and ran from early 1995 through the end of 1996. Lastly, cases were selected from the Office of Court Administration records of cases that were flagged as domestic violence at arrest, from 1995 through 1997. However, identification of cases as domestic violence may have been incomplete in the early period.

SOURCES OF INFORMATION

Data were collected from the following sources: (1) the District Attorney's Office Management Information System, (2) the District Attorney's Office Domestic Violence Bureau log book of pending felonies, (3) the District Attorney's Domestic Violence Bureau trial list of open felony cases, and (4) Office of Court Administration records.

SAMPLE

The following criteria were used for sampling: (1) all cases had to be indicted on felony charges from 1995 through 1997, (2) all cases had to be prosecuted by the District Attorney's Domestic Violence Bureau, (3) no cases that were consolidated with a non-domestic violence case were eligible, (4) all cases had to be adjudicated in the state Supreme Court, (5) cases during the first six months of operation of the FDVC (June to December 1996) were ineligible because the court model was not yet fully in place, (6) cases which began in another Supreme Court part but were transferred to the FDVC were ineligible (pre/post crossover), (7) cases determined not to involve domestic violence were ineligible, (8) cases listed in only one of the four data sources were not pursued because of a low likelihood that they would prove eligible, (9) cases in which the files were repeatedly unavailable were dropped from the samples, and (10) cases that were superseded by or consolidated with another felony domestic violence case were not included in the sample as separate cases, because the case with which they were associated often was included in the sample.

RESPONSE RATES

SUMMARY OF CONTENTS

DESCRIPTION OF VARIABLES

Variables in Part 1, Recidivism Data, contain information on number of appearance warrants issued; days incarcerated for pre-disposition; number of appearances for pre-disposition and post-disposition; bail conditions (i.e., batterer treatment or drug treatment); top charge at arrest, indictment, and disposition; indications of defendant's substance abuse of alcohol, marijuana, or other drugs, and psychological problems; types of disposition and probation; months of incarceration; sentence conditions; history of abuse by defendant against the victim; length of abuse in months; history of physical assault and sexual abuse; past weapon use; and medical attention needed for past domestic violence. Additional variables focus on whether an order of protection was issued before the current incident, whether the defendant was arrested for past domestic violence with this victim, total number of known victims, weapon used during incident, injury during the incident, medical attention sought, number of final orders of protection, whether the defendant was jailed throughout the pending case, number of releases during the case, number of reincarcerations after release, whether the victim lived with the defendant, whether the victim lived with children in common with the defendant, relationship between the victim and the defendant, number of months the victim had known the defendant, number of children in common with the defendant, whether the victim attempted to drop charges, whether the victim testified at trial, whether a victim advocate was assigned, total violations during pending case, pre-disposition violations, and number of probation violations. Demographic variables in Part 1 include defendant and victims' gender, race, victim age at defendant's arrest, defendant's income, employment status, and education. Variables in Part 2, Top Charge Data, relating to the defendant include number and types of prior arrests and convictions, top charge at arrest, severity of top charge at arrest, top charge at grand jury indictment, severity of top charge indictment, disposition details, Uniform Crime Reporting (UCR)

arrest indicators, child victim conviction indicator, drug conviction indicator, weapon conviction indicator, types of probation, sentence, disposition, and offenses. Demographic variables in Part 2 include sex and race of the defendant.

PRESENCE OF COMMON SCALES

None.

UNIT OF OBSERVATION

court cases

EXTENT OF PROCESSING

Missing data codes were standardized by the principal investigator and ICPSR. ICPSR checked for undocumented codes, produced a codebook, generated SAS and SPSS data definition statements, and reformatted the data and documentation.

EXTENT OF COLLECTION

This data collection consists of two data files, a PDF user guide and codebook, and SAS and SPSS data definition statements.

DATA COLLECTION NOTES

The user guide and codebook are provided by ICPSR as a Portable Document Format (PDF) file. The PDF file format was developed by Adobe Systems Incorporated and can be accessed using PDF reader software, such as the Adobe Acrobat Reader. Information on how to obtain a copy of the Acrobat Reader is provided on the ICPSR Web site.

FINAL REPORTS AND OTHER PUBLICATIONS

The National Criminal Justice Reference Service (NCJRS) was established in 1972 by the National Institute of Justice (NIJ), of the U.S. Department of Justice, to provide research findings to criminal justice professionals and researchers. NCJRS operates specialized clearinghouses that are staffed by information specialists who supply a range of reference, referral, and distribution services. Final reports and other publications describing research conducted on a variety of criminal justice topics are available. Publications can be obtained from NCJRS at NIJ/NCJRS, Box 6000, Rockville, MD, 20849-6000, 800-851-3420 or 301-519-5500. TTY Service for the Hearing Impaired is 877-712-9279 (toll-free) or 301-947-8374 (local). The URL for the NCJRS homepage is:

http://www.ncjrs.org

DATA RESOURCES PROGRAM ON THE INTERNET

The National Institute of Justice Data Resources Program (DRP) makes datasets from NIJ-funded research and evaluation projects available to the research community and sponsors research and training activities devoted to secondary data analysis. Datasets are archived by the National Archive of Criminal Justice Data (NACJD) at the Inter-university Consortium for Political and Social Research (ICPSR) at the University of Michigan.

The NACJD maintains a World Wide Web site with instructions for transferring files and sending messages. Criminal justice data funded by the Department of Justice are available via the Internet at this site at no charge to the user. NACJD may be contacted at NACJD/ICPSR, P.O. Box 1248, Ann Arbor, MI, 48106-1248, 800-999-0960 or 734-998-9825. The URL for the NACJD homepage is:

DTARREST	ARREST DATE	100.0%
DATEDISP	DISPOSITION DATE	100.0%

*Variables individually listed only if greater than 5% missing values. Data does not contain skip patterns or skip patterns are not reflected in the data as coded.

*Variables ARRESTDT, SCARRDT, DTARREST, and DATEDISP were blanked by ICPSR for confidentiality purposes.

ICPSR CODEBOOK NOTES

1. ICPSR recoded system missing to a 9-series code and labeled these codes "Blank."

2. For confidentiality purposes ICPSR blanked variables DZIP, DPCT, VZIP, VPCT, ARRESTDT, CCARRDT, GJINDDT, DISPDT, and SENTDT in Part 1, and ARRESTDT, SCARRDT, DTARREST, and DATEDISP in Part 2, and recoded DRACE, VRACE, DLANG2, and VLANG2 in Part 1. For the same purposes, for Part 1, ICPSR computed new variables NCCARDT, NGJINDDT, NDISPDT, and NSENTDT by subtracting CCARRDT, GJINDDT, DISPDT, and SENTDT from ARRESTDT respectively, and computed new variables NSCARRDT and NDATEDIS by subtracting SCARRDT, and DATEDISP from ARRESTDT respectively in Part 2.

3. The variables NCCARDT, NGJINDDT, NDISPDT, and NSENTDT in Part 1, and NSCARRDT and NDATEDIS in Part 2 were created by ICPSR by substracting two date variables, as described above. Some values for these variables are out of range due to mispunches in the original date variables. Users should examine these variables carefully before using them in analyses.

4. ICPSR was unable to verify undocumented code 4 for variable VTODCAT in Part 1 with the principal investigators thus labeled this code "undoc."

5. Some values in variable VYOB in Part 1 and X51 in Part 2 are out of range. Users should examine these variables carefully before using them in analyses.

6. The principal investigators provided categorical value labels for variable X49 in Part 2 as shown in the appendix while the values in the data file are continuous. Users should examine the variable carefully to see if it is usable in analyses.

7. The following abbreviations were used in the data definition statements and codebook.

   ISP= Intensive Supervision
   OOP= Order of Protection
   DCJS= The New York State Division of Criminal Justice Services
   TASC= Treatment Alternatives to Street Crime
   VFO= Violent Felony Offense

CODEBOOK FOR ICPSR 3382

IMPACT EVALUATION OF THE FELONY DOMESTIC VIOLENCE
COURT IN KINGS [BROOKLYN], NEW YORK, 1994-2000

(PART 1: RECIDIVISM DATA)

PLEASE NOTE: The "M" between the code and the code label indicates the code has been designated as a missing value.
