## ICPSR PROCESSING NOTES

The following codebook notes will be added for all Wave 1 Cohort studies.

1. The Murray Research Center conducted the initial data and documentation processing for this collection, including the initial confidentiality review. ICPSR performed the following additional checks:
  - verified that respondent confidentiality was protected
  - checked for undocumented codes for categorical variables and out-of-range values for continuous variables
  - noted inconsistencies in missing value designations.
2. ICPSR altered the data files from the Murray Research Center in the following ways:
  - reordered the variables so that the administrative variables (e.g., ID, wave number, cohort number, and dates) were at the beginning of each file and that the order of the other variables followed the data collection instrument
  - reformatted date and time variables to make them compatible across statistical packages
  - standardized abbreviations in variable and value labels and fixed misspellings in order to facilitate metadata searching
  - recoded character variables to numeric variables and standardized response codes across cohorts.
3. The Murray Research Center converted the original data collection instruments to Portable Document Format (PDF). ICPSR enhanced this PDF document by making all of the text searchable. The document is distributed as the questionnaire file for this study. Additionally, ICPSR created the following PDF documentation:
  - Data Completeness Reports summarizing the amount of missing data in each file
  - codebooks listing the metadata for each variable, as well as frequencies, summary statistics, and, in some cases, original question text
  - processing notes and appendices documenting additional information, as necessary.
4. As noted above, ICPSR recoded all character variables to numeric. ICPSR simply assigned the character values to a number and used the text of the character variable as a value label. ICPSR did not alter the text from the character variable; therefore, the value labels may contain spelling errors or unusual characters (e.g., \*). ICPSR standardized the numbering of the responses across all files in the study to facilitate

comparison across files. The following character variables were recoded to numeric variables for this data collection:

FESFILE  
FESRAID  
FES28

5. The following abbreviations are used in the codebook and setup files:

PC = Primary Caregiver  
SUB = Subject  
FES = Family Environment Scale

## Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

**Table 1: Distribution of Variables by Percentage of Missing Values--Cohort 15**

Variable Name and Label (Total Cases = 687 )		Percent of Cases with Missing Values
6.1% ( 3 of 49 variables)	have 0% Missing Values	
51.0% ( 25 of 49 variables)	have 0% - 1% Missing Values	
20.4% ( 10 of 49 variables)	have 1% - 3% Missing Values	
4.1% ( 2 of 49 variables)	have 3% - 5% Missing Values	
0.0% ( 0 of 49 variables)	have 5% - 10% Missing Values	
0.0% ( 0 of 49 variables)	have 10% - 20% Missing Values	
0.0% ( 0 of 49 variables)	have 20% - 40% Missing Values	
18.4% ( 9 of 49 variables)	have 40% - 100% Missing Values	
BASISID	basis ID for multi-subject household	88.5%
FESRAID	RA id for FES measure	93.6%
MONFE	month of FES measure	93.6%
DAYFE	day of FES measure	93.6%
YRFE	year of FES measure	93.6%
HRSFES	hour FES measure started	94.3%
MINFES	minute FES measure started	94.3%
HRSFEE	hour FES measure ended	94.2%
MINFEE	minute FES measure ended	94.2%
