ICPSR PROCESSING NOTES

1. The Murray Research Center conducted the initial data and documentation processing for this collection, including the initial confidentiality review. ICPSR performed the following additional checks:
 - verified that respondent confidentiality was protected
 - checked for undocumented codes for categorical variables and out-of-range values for continuous variables
 - noted inconsistencies in missing value designations.
2. ICPSR altered the data files from the Murray Research Center in the following ways:
 - reordered the variables so that the administrative variables (e.g., ID, wave number, cohort number, and dates) were at the beginning of each file and that the order of the other variables followed the data collection instrument
 - reformatted date and time variables to make them compatible across statistical packages
 - standardized abbreviations in variable and value labels and fixed misspellings in order to facilitate metadata searching
 - recoded character variables to numeric variables and standardized response codes across cohorts.
3. The Murray Research Center converted the original data collection instruments to Portable Document Format (PDF). ICPSR enhanced this PDF document by making all of the text searchable. The document is distributed as the questionnaire file for this study. Additionally, ICPSR created the following PDF documentation:
 - Data Completeness Reports summarizing the amount of missing data in each file
 - codebooks listing the metadata for each variable, as well as frequencies, summary statistics, and, in some cases, original question text
 - processing notes and appendices documenting additional information, as necessary.
4. Users should note that the values for variable SUBID3 have been reassigned from the original variable SUBID in order to protect respondent privacy. Users interested in obtaining these data must complete a Data Transfer Agreement Form and specify the reasons for the request. A copy of the Data Transfer Agreement Form can be requested by calling 800-999-0960. The Data Transfer Agreement Form is also available as a Portable Document Format (PDF) file from the NACJD Web site at <http://www.icpsr.umich.edu/NACJD/Private/private.pdf>. Completed forms

should be returned to: Director, National Archive of Criminal Justice Data, Inter-university Consortium for Political and Social Research, Institute for Social Research, P.O. Box 1248, University of Michigan, Ann Arbor, MI 48106-1248, or by fax: 734-647-8200.

5. Users should note that the codebook frequencies provided by ICPSR are from the public use files and that this version of the codebook documents both the public and restricted use data.
6. As noted above, ICPSR recoded all character variables to numeric. ICPSR simply assigned the character values to a number and used the text of the character variable as a value label. ICPSR did not alter the text from the character variable; therefore, the value labels may contain spelling errors or unusual characters (e.g., *). ICPSR standardized the numbering of the responses across all files in the study to facilitate comparison across files. The following character variables were recoded to numeric variables for this data collection:

RE6O	best age for person to first have a baby
RE7O	youngest age can imagine having baby
RE9O	best age for a girl to start having sex
RE10O	best age for a boy to start having sex
7. The following abbreviations are used in the codebook and setup files:
PC = Primary Caregiver
RELA = Relationships
SUB = Subject
8. The following continuous variables have values that appear to be out of a valid range:
RE1AGE age of first date/started 'going out' - value of 22 (1 case)

Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values--Cohort 9

Variable Name and Label (Total Cases = 594)	Percent of Cases with Missing Values
9.8% (6 of 61 variables)	have 0% Missing Values
0.0% (0 of 61 variables)	have 0% - 1% Missing Values
0.0% (0 of 61 variables)	have 1% - 3% Missing Values
1.6% (1 of 61 variables)	have 3% - 5% Missing Values
14.8% (9 of 61 variables)	have 5% - 10% Missing Values
SA_TYPE	self-administered? (0=RA read) 6.4%
RE1	had first date/started 'going out'? 6.9%
RE3	people better off saying no to sex 7.4%
RE4	not want parents know about my having sex 7.2%
RE5	if peers don't have sex friends make fun 7.4%
RE6	best age for person to first have a baby 9.4%
RE8	# close friends who have had babies 5.1%
RE11	# friends who you think have had sex 7.6%
RE12	ever had sexual intercourse? 7.1%
4.9% (3 of 61 variables)	have 10% - 20% Missing Values
RE7	youngest age can imagine having baby 13.1%
RE9	best age for a girl to start having sex 12.0%
RE10	best age for a boy to start having sex 11.1%
0.0% (0 of 61 variables)	have 20% - 40% Missing Values
36.1% (22 of 61 variables)	have 40% - 99% Missing Values
RE1AGE	age of first date/started 'going out' 62.1%
RE1N	# dates, past month 78.1%
RE6O	best age for person to first have a baby 96.0%
RE7O	youngest age can imagine having baby 98.5%
RE9O	best age for a girl to start having sex 96.5%
RE10O	best age for a boy to start having sex 96.5%

Table 1: Distribution of Variables by Percentage of Missing Values--Cohort 9

Variable Name and Label (Total Cases = 594)	Percent of Cases with Missing Values
RE13	age first had sexual intercourse 92.6%
RE14	when first had sexual intercourse ... 91.1%
RE15	when first had sexual intercourse ... 91.4%
RE16	sex with more than 1 person? 84.3%
RE16A	# different sexual partners 92.6%
RE17E	ever use rubber/condom? 92.8%
RE18E	use rubber/condom last time? 93.4%
RE19	ever gotten someone pregnant? 92.4%
RE20	ever been pregnant? 92.3%
RE21	pregnant now? 96.1%
RE22	# times pregnant 98.0%
RE23	# days/past week at least 20 minutes sweaty activity 49.7%
RE24	# days/past week at least 30 minutes non-sweaty activity 50.2%
RE25	# hours watch TV, average school day 49.8%
RE26	# days attend physical ed classes, average school week 50.5%
RE27	# sports teams played on, past year 50.7%
32.8% (20 of 61 variables)	have 100% missing values
RE17A	sometimes use no birth control/protection? 99.2%
RE17B	ever use 'the pill'/Norplant? 99.2%
RE17C	ever use foam/cream/jelly/suppository? 100.0%
RE17D	ever use diaphragm/sponge? 100.0%
RE17F	ever use withdrawal/pulling out? 99.3%
RE17G	ever use rhythm method? 99.8%
RE17H1	ever use other birth control method? 99.5%
RE18A	use no birth control/protection last time? 99.5%
RE18B	use 'the pill'/Norplant last time? 99.3%
RE18C	use foam/cream/jelly/supposit last time? 100.0%
RE18D	use diaphragm/sponge last time? 99.8%
RE18F	use withdrawal/pulling out last time? 99.7%
RE18G	use rhythm method last time? 99.8%
RE18H1	use other birth contrl method last time? 99.8%
RE19A	age first got someone pregnant 99.8%
RE22AGE	age first pregnant 99.7%
RE22_1	outcome of first pregnancy 99.7%

Table 1: Distribution of Variables by Percentage of Missing Values--Cohort 9

Variable Name and Label (Total Cases = 594)		Percent of Cases with Missing Values
RE22_2	outcome of 2nd pregnancy	99.8%
RE22_3	outcome of 3rd pregnancy	99.8%
RE22_4	outcome of 4th pregnancy	99.8%
