ICPSR CODEBOOK NOTES
Public Defender Data

- 1) For Part 3, ICPSR masked the COUNTY "COUNTY NAME" variable in the downloadable dataset due to confidentiality concerns. The original content of this variable is available through our restricted access procedures (see note 4 below).
- 2) The principal investigators supplied a table which provides detailed response rate information for Part 1, Part 2, and Part 3 of this data collection. This table is included as an appendix to the ICPSR codebooks. Nonetheless, users should be aware that the figures provided in the response rate table differ slightly from the frequencies indicated in the COUNTY "COUNTY NAME" variable for some counties in Part 3.

California: A total of 76 surveys were received according to the response rate table; a total of 72 surveys were received according to the data.

Specifically, the response rate table indicates that the researchers received 29 public defender surveys from Ventura County while the data indicate that 25 surveys were received from Ventura County. The response rate table and the data correspond exactly for Napa County and Contra Costa County.

Florida: A total of 80 surveys were received according to the response rate table; a total of 84 surveys were received according to the data.

Specifically, the response rate table indicates that the researchers received 39 public defender surveys from Duval County while the data indicate that 44 surveys were received from Duval County. The response rate table indicates that the researchers received 41 public defender surveys from Pinellas County while the data indicate that 40 surveys were received from Pinellas County.

Minnesota: A total of 103 surveys were received according to the response rate table; a total of 104 surveys were received according to the data.

Specifically, the response rate table indicates that the researchers received 15 public defender surveys from Duluth County while the data indicate that 17 surveys were received from Duluth County. The response rate table indicates that the researchers received 5 public defender surveys from Virginia County while the data indicate that 4 surveys were received from Virginia County. The response rate table and the data correspond exactly for the counties of Dakota, Hennepin, Kandiyohi, Olmsted, and Ramsey.

Part 3 Total (CA, FL, and MN): The response table lists a total of 259 culture surveys received while the data include a total of 260 cases.

- 3) To address confidentiality concerns, certain identifying information is restricted from general dissemination. Specifically the content of some character variables and variables that facilitate the indirect identification of individuals are restricted from

general dissemination at this time. Users interested in obtaining these data must complete a Restricted Data Use Agreement form and specify the reasons for the request. A copy of the Restricted Data Use Agreement form can be requested by calling 800-999-0960. Researchers can also download this form as a Portable Document Format (PDF) file from the download page associated with this dataset.

Completed forms should be returned to: Director, National Archive of Criminal Justice Data, Inter-university Consortium for Political and Social Research, Institute for Social Research, P.O. Box 1248, University of Michigan, Ann Arbor, MI 48106-1248, or by fax: 734-647-8200.
