Study Scope	
Abstract	

The UNIFORM CRIME REPORTING PROGRAM DATA [UNITED STATES]:SUPPLEMENTARY HOMICIDE REPORTS, 2007 (SHR) provide detailed information on criminal homicides reported to the police. These homicides consist of murders; non-negligent killings also called non-negligent manslaughter; and justifiable homicides. UCR Program contributors compile and submit their crime data by one of two means: either directly to the FBI or through their State UCR Programs. State UCR programs frequently impose mandatory reporting requirements which have been effective in increasing both the number of reporting agencies as well as the number and accuracy of each participating agency's reports. Each agency may be identified by its numeric state code, alpha-numeric agency ("ORI") code, jurisdiction population, and population group. In addition, each homicide incident is identified by month of occurrence and situation type, allowing flexibility in creating aggregations and subsets.

Summary Data Description	
Time Period:	2007
Date(s) of Collection:	2007
Country:	United States
Geographic Coverage:	US states, counties, cities
Unit of Analysis:	Homicide incidents
Universe:	Homicide incidents reported by law enforcement agencies in the United States

Kind of Data:	Aggregate Data

Notes

The unit of analysis in this dataset is the homicide "incident" as defined by the Uniform Crime Reporting (UCR) Program. Thus, information on the victim(s), the offender(s), the relationship between these individuals, the weapons used, and the circumstances surrounding the homicide are provided by incident. Up to eleven offenders can be involved in an incident. The Uniform Crime Reporting Program (UCR) is a data collection effort designed to provide an overall view of crime in the United States. Data for the UCR have been gathered by the Federal Bureau of Investigation (FBI) since 1930. The data are compiled from law enforcement agencies on a monthly basis. UCR data housed at the Inter-university Consortium for Political and Social Research (ICPSR) include: OFFENSES KNOWN AND CLEARANCES BY ARREST (also known as RETURN A), PROPERTY STOLEN AND RECOVERED (also known as SUPPLEMENT TO RETURN A), SUPPLEMENTARY HOMICIDE REPORTS (SHR), and POLICE EMPLOYEE (LEOKA) DATA. The UCR data for 1975-1997 are archived under ICPSR study number 9028. Starting with the 1998 UCR data each of the main data files comprising the UCR has been given its own ICPSR study number. New study numbers will be issued each year for OFFENSES KNOWN AND CLEARANCES BY ARREST, PROPERTY STOLEN AND RECOVERED, SUPPLEMENTAL HOMICIDE REPORTS, and POLICE EMPLOYEE (LEOKA) DATA. Each UCR data file, regardless of year or study number, has its own documentation specific to it.

Methodology and Processing

Data Collection Methodology

Time Method:	Cross-section
Data Collector:	United States Department of Justice. Federal Bureau of Investigation
Frequency of Data Collection:	Monthly
Mode of Data Collection:	Mail-in Forms
Characteristics of Data Collection Situation:	UCR data are submitted voluntarily by city, county, and state law enforcement agencies. Some agencies receive forms directly from the FBI and return them directly to the FBI. Many others receive forms from state collecting programs and return these forms to those programs. The state programs, in turn, forward the reports to the FBI. Reports are sent out and collected on a monthly basis.

Law enforcement agencies that reported criminal homicides on the basic UCR Return A form - from which come the Offenses Known and Clearances by Arrest data files: ICPSR 9028 (Parts 1, 5, 9,...97), ICPSR 2904 (1998), ICSPR 3162 (1999), ICPSR 3451 (2000), ICPSR 3723 (2001), ICPSR 4008 (2002), and ICPSR 4124 (2003) - were requested but not required to submit a Supplementary Homicide Report (SHR) for each month in which homicides became known. The SHR was not submitted by agencies for months in which no homicides were reported to police.

In contrast to data collection procedures for the UCR Return A forms where one offense is counted for each victim of a personal crime (i.e., criminal homicide, rape, and assault), the SHR's unit of analysis is the incident or "homicide situation" which may involve more than one victim.

Information on single or multiple victim and offender homicides was gathered and categorized in a six-level situation code (i.e., single victim/single offender, single victim/unknown offender(s), single victim/multiple offenders, multiple victims/single offender, multiple victims/unknown offender(s), multiple victims/multiple offenders) which were "keyed" to each victim. In situations where two or more victims were killed by a single offender, the offender data were collected and linked to each victim. In other words, the offender data were recorded twice, in order to be linked to each victim. This method also was used in multiple victims/multiple offenders situations. This practice does not result in multiple counting of offenders in as much as the situation code and the offender count

variables indicate the number of offenders involved. The utilization of the situation code signifies distinct murder situations which are defined as being separated by time and place of occurrence, regardless of the number of victims (or offenders).

Control Operations:	Once received, the FBI checks the agencies' reports for completeness and arithmetical accuracy. If an unusual fluctuation is detected in an agency's crime count, the FBI compares those counts with counts from previous reports or compares the frequencies to those of agencies similar to the agency in question. When necessary, law enforcement agencies are contacted to correct or explain the figures.

Data Access

Dataset Availability

Location:	Inter-university Consortium for Political and Social Research

Data Use Statement:

Restrictions:	In preparing data for public release, ICPSR performs a number of procedures to ensure that the identity of research subjects cannot be disclosed. Any intentional identification or disclosure of a person or establishment violates the assurances of confidentiality given to the providers of the information. Therefore, users of data obtained from the ICPSR archive and/or any of its special topic archives agree: 1) To use these datasets solely for statistical analysis and reporting of aggregated information, and not for investigation of specific individuals or organizations, except when identification is authorized in writing by ICPSR. 2) To make no use of the identity of any person or establishment discovered inadvertently, and to advise ICPSR of any such discovery. 3) To produce no links among ICPSR datasets or among ICPSR data and other datasets that could identify individuals or organizations
Citation Requirement:	Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications.
Deposit Requirement:	To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Visit the ICPSR Web site for more information on submitting citations.
Conditions:	ICPSR data may not be redistributed or sold to other individuals, institutions, or organizations without the written agreement of ICPSR.
Disclaimer:	The original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

File Structure (rectangular)

File Dimensions:

- No. of Cases: 14,977
- No. of Variables: 152
- Record Length: 270
- Records per Case: 1
- Overall No. of Records: 14,977

Extent of Processing Checks: The data collection was processed according to standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were resolved or recoded to missing data. No consistency checks were performed.

Missing Data: Starting with the 1998 data, ICPSR did not recode blanks or system missing data to standardized values. Users should note that blanks and missing data may have a substantive meaning under the FBI coding scheme. Users should refer to the documentation for explanation of individual variables.
