ICPSR CODEBOOK NOTES
Austin, Texas Longitudinal Data

- 1) ICPSR repeated the variable names as the variable labels for the MONTH and YEAR variables.
- 2) ICPSR also added value labels of “Pre-intervention” to the value of 0 and “Post-intervention” to the value of 1 for the INTERVNT “FULL CED IMPLEMENTATION” variable in the downloadable dataset based on correspondence with the principal investigators.

Multi-Method Evaluation of Police Use of Force Outcomes: Cities, Counties, and National, 1998-2007 [United States]

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
