## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

### ICPSR CODEBOOK NOTES

- 1) To protect respondent privacy, certain identifying information is restricted from general dissemination. Additional data not included in the downloadable version are available in a restricted version of this data collection. Users interested in obtaining restricted data must complete and sign a Restricted Data Use Agreement, describe the research project and data protection plan, and obtain IRB approval or notice of exemption for their research.
- 2) ICPSR masked variables RACE\_67, RACE\_ETHNIC, COB\_69, MNTH\_70A, DAY\_70B, YEAR\_70C, REF\_71 and RANDOM\_GRP in the downloadable dataset to protect respondent confidentiality. The original content of these variables, excluding variable DAY\_70B, are available through our restricted access procedures (see note 1 above).
- 3) ICPSR masked certain variables in the restricted version of this dataset due to confidentiality concerns. Specifically, ICPSR masked the DAY\_70B "Birth Date Day". The original, unmasked values in variable DAY\_70B are not available to secondary users of the data, even under restricted access procedures. However, the data contain variables MNTH\_70A "Birth Date Month" and YEAR\_70C "Birth Date Year". In addition, ICPSR recoded all countries other than USA into one category of "Other Country" in variable COB\_69 for confidentiality in the restricted version. The original, unmasked values in variable COB\_69 are not available to secondary users of the data, even under restricted access procedures.
- 4) ICPSR edited some of the variable names in the dataset by removing each "@" symbol in a variable name and moving the letter before the numerals in variable names due to SPSS limitations. Please reference the Appendix for specific variable label changes.
- 5) ICPSR recoded certain variables in the downloadable version of this dataset due to confidentiality concerns. Specifically, ICPSR recoded CTS\_PSYC\_GRPS, THEMB\_74 and YOUB\_76.0
- 6) ICPSR added value labels to variables CTS\_SEVERITY\_A and CTS\_SEVERITY\_B based on information from other variables and information in the final report.
- 7) ICPSR assigned the following value labels based on information in the codebook:  
  
THEMB\_74 – 0 "N/A – person takes care of his/her own basic needs"  
YOUB\_76 – 0 "N/A – can take care of own basic needs"  
REF\_71 – 9 "Missing"
- 8) ICPSR recoded blanks in numeric variables to -9 and labeled them Blank.

- 9) ICPSR created the CASEID "CASE IDENTIFIER CREATED BY ICPSR" variable, which is a unique identifier.

### Variable Description and Frequencies

**Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.**

**Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.**

ICPSR has an FAQ on [copyright and survey instruments](#).
