## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

## **Bibliographic Description**

ICPSR Study No.: 28561

Title: National Elder Mistreatment Study, 2008 [United States]

Principal Investigator(s): Ronald Acierno, Medical University of South Carolina

Heidi Resnick, Medical University of South Carolina

Dean Kilpatrick, Medical University of South Carolina

## **Scope of Study**

Summary: The overall aim of this project was to conduct a national epidemiological study to determine prevalence and risk factors for elder mistreatment in community residing older adults, defined generally as physical, sexual, emotional, neglectful, or financial mistreatment of a person aged 60 years or older. A second goal was to determine whether proxy reports of mistreatment would yield prevalence estimates similar to those of older adult respondents themselves, thereby demonstrating the validity of an alternate method of assessing elder mistreatment. Random Digit Dialing methodology was used to derive a nationally representative sample (based on age, race, and gender) of 6,052 older adults (target goal 4,000) and 538 proxy respondents (target goal 500) for this study. Participants were interviewed via telephone in English or Spanish about a variety of mistreatment types and mistreatment risk factors, in addition to questions regarding health, social support, and demographics. Specific

elder mistreatment categories included emotional, physical, sexual, financial, and neglect.

Subject Term(s): assault, elder abuse, eldercare, emotional abuse, exploitation, older adults, sexual assault, social support

Smallest Geographic Unit: None

Geographic Coverage: United States

Time Period: • February 6, 2008 - September 9, 2008

Date(s) of Collection: • February 6, 2008 - September 9, 2008

Unit of Observation: individual

Universe: All adults aged 60 years or older across the continental United States (excluding Alaska and Hawaii), and all individuals who lived with or cared for an individual aged 60 years or older between February 2, 2008 and September 9, 2008.

Data Type: survey data

Data Collection Notes: The project's report (Acierno, Hernandez-Tejada, Muzzy, and Steve, 2009; NCJ 226456) references a sample of 5,777 older adults and 813 proxies, however the data being distributed as part of this collection contains information on 6,052 older adults and 538 proxies.

## Methodology

Purpose of the Study: The overall aim of this project was to conduct a national epidemiological study to determine prevalence and risk factors for elder mistreatment in community residing older adults, defined generally as physical, sexual, emotional, neglectful, or financial mistreatment of a person aged 60 years or older. A second goal was to determine whether proxy reports of mistreatment would yield prevalence estimates similar to those of older adult respondents themselves, thereby demonstrating the validity of an alternate method of assessing elder mistreatment.

Study Design: The study was comprised of a telephone survey of older adults across the continental United States (excluding Alaska and Hawaii). The survey was administered via computer assisted telephone interview (CATI) script, and contained two separate interviews. The base interview was designed to be used directly with adults aged 60 years or older. The second, or proxy interview was designed to be used with individuals who

lived with an older adult aged 60 or older (and may or may not fulfill caretaker duties). Given that the quota for proxy interviews was set at approximately 11 percent of the total sample, screening questions and algorithms were built into the first part of the script to identify households with elder adults, and determine who would be interviewed (adult or proxy). Whenever an index older adult (index defined as that person over age 60 who most recently had a birthday) was judged to be potentially unable to give informed consent the default response was to conduct a proxy interview. The proportion of older adult vs. proxy interviews was continually examined to maintain the 9:1 ratio. Individuals from 6,590 randomly selected households were interviewed. Of these households, interviews were collected from 6,052 older adults (target goal 4,000), and 538 individuals who lived with or cared for older adults, (target goal 500). Participants were interviewed via telephone in English or Spanish about a variety of mistreatment types and mistreatment risk factors, in addition to questions regarding health, social support, and demographics. Specific elder mistreatment categories included emotional, physical, sexual, financial, and neglect.

Sample: Based on the Current Population Survey conducted by the United States, Census Bureau, it was estimated that approximately 26 percent of households in the United States would have an adult over the age of 59 living at the residence. The number of those who would be impaired (i.e., unable to participate in the interview) was much smaller. Therefore efforts were made to ensure that at least 10 percent of the surveys were completed by proxy in the final dataset. The full-scale test targeted a total of 6,500 completed interviews, thus the proxy target was at least 650.

The survey samples were based on a modified stratified random digit dialing (RDD) method, using an area probability/RDD sample rather than a single-stage/RDD sample. The sample was stratified by time zone within the continental United States (Eastern, Central, Mountain and Pacific) to better reflect population densities within each region.

Once the sample had been geographically stratified with sample allocation proportionate to population distribution, a sample of assigned telephone banks was randomly selected from an enumeration of the Working Residential Hundreds Blocks of the active telephone exchanges within the region. The Working Residential Hundreds Blocks were defined as each block of 100 potential telephone numbers within an exchange that included 3 or more residential listings. (Exchanges with one or two listings were excluded because in most cases such listings represent errors in the published listings). The sampling frame for working hundreds blocks in all surveys using random digit dialing is restricted to land-line telephones since there are no public listings of cell phones. Further, federal law prohibits the use of auto-dialers in calling of cell phone numbers. Hence, any known cell phone banks and numbers ported from

land-line to cell phone are systematically excluded from the RDD land-line samples.

In the third stage sample, a two-digit number was randomly generated by computer for each Working Residential Hundreds Block selected in the second stage sample. This third stage sampling process is the RDD component. Every telephone number within the Hundreds Block has an equal probability of selection, regardless of whether it is listed or unlisted. The third stage RDD sample of telephone numbers was then dialed by SRBI interviewers to determine which were currently working residential household phone numbers. Non-working numbers and non-residential numbers were immediately replaced by other RDD numbers selected within the same stratum in the same fashion as the initial number. Ineligible households (e.g., no adult in the household, language barriers other than Spanish) were also immediately replaced. Non-answering numbers were not replaced until the research protocol was met.

The sample construction process yielded a population-based, RDD sample of telephone numbers. The systematic dialing of those numbers to obtain a residential contact yielded a random sample of telephone households. The next step was to select eligible households within the total sample of working numbers. An adult respondent at each number drawn into the sampling frame was contacted about the composition of the household. Telephone numbers that yielded non-residential contacts such as businesses, churches, and college dormitories, were screened out. Only households, i.e., residences in which any number of related individuals or no more than five unrelated persons living together, were eligible for inclusion in the sample. This minimal screening was only to ascertain that the sample of telephone numbers reached by interviewers was residential households.

A systematic selection procedure was used to select one designated respondent for each household sampled. First, the total number of age-eligible adults in the household was ascertained from a household informant. If there was only one eligible adult in the household that individual was the designated respondent. The "most recent/next birthday method" was used for within household selection among multiple eligibles.

In cases where there was even the slightest indication that an older adult respondent was cognitively impaired, the interviewer attempted to use a proxy respondent. If the impaired older adult lived with more than one other person, the proxy was identified as the person living in the household who is closest to, or spends the most time with the adult. If the older adult lived alone, a proxy could be identified if they had face to face contact with the adult on a regular basis, that is, at least every other day. As mentioned, proxy respondents were also sought in order to main the 9:1 proportion outlined above. Thus, the proxy selection procedure was also applied to a random selection of households where

the older adult was not impaired to ensure there was enough proxy interviews in the completed sample to make meaningful comparisons.

A total of 6,590 randomly selected households were surveyed. Of these households, interviews were collected from 6,052 older adults (target goal 4,000), and 538 individuals who lived with or cared for older adults, here classified as "proxy" respondents (target goal 500).

**Weight:** The weighting plan for the survey was a two-stage sequential. The first stage in the sample weighting procedure was designed to correct for procedures that yielded unequal probability of selection within sampled households. Although the survey was designed as a population survey, only one eligible person per household could be interviewed (because multiple interviews per household are burdensome and introduce additional design effects into the survey estimates). A respondent's probability for selection is inverse to the size (number of other eligible adults) of the household. Hence, the base weight was equal to the number of eligible respondents within the household.

The second step in the weighting process was to correct the study design for non-response bias by dividing the expected population distribution, based on Census projections, by the base-weighted sample distribution for age and gender. Specifically, the post-stratification weight corrected the sample to the cell distribution of the population for the eight separate age groups (60-61, 62-64, 65-66, 67-69, 70-74, 75-79, 80-84, and 85 or older) by gender using the 2000 Census Population estimates for Age and Sex.

**Sources of Information:** Medical University of South Carolina Elder Mistreatment Survey

**Mode of Data Collection:** computer-assisted telephone interview (CATI)

**Description of Variables:** The study contains 448 variables including demographic characteristics of elderly adult, household demographics, recent health, prior traumatic stressors, social support available, emotional mistreatment, physical mistreatment, sexual mistreatment, financial exploitation, and neglect of the elderly adult. Demographic characteristics of the elderly adult and household included gender, race/ethnicity, age, marital status, education level, employment status, and income. Regarding recent health, the survey asked how elderly adults would rate their health during the past four weeks, whether physical health problems limited their usual physical activities, how much difficulty they had doing their daily work, both at home and away from home, because of their physical health, how much bodily pain and energy they had, how much their physical health or emotional problems limited their usual social activities with family or friends, how much they had been bothered by emotional problems such

as feeling anxious, depressed or irritable, and how much personal or emotional problems kept them from doing their usual work, school or other daily activities. Prior traumatic stressors were measured by asking respondents whether they had ever experienced a serious accident at work, in a car, or somewhere else in which they thought they might be seriously injured or killed, whether they had ever experienced a tornado, hurricane, flood, major earthquake, or other natural disaster in which they thought they might be seriously injured or killed, whether they had ever seen someone seriously injured or violently killed, and whether they had ever experienced any other situation in which they were permanently physically harmed or had a life threatening illness. Social support was measured by asking respondents how often someone was available to help them if they were confined to bed, give them good advice about a crisis, get together with them for relaxation, talk to them about their problems, and love them and make them feel wanted. In addition respondents were asked what type of programs or services they participated in.

Emotional mistreatment was measured by asking respondents whether anyone has ever verbally attacked, scolded, or yelled at them so that they felt afraid for their safety, threatened or intimidated, whether anyone ever made them feel humiliated or embarrassed, whether anyone ever forcefully or repeatedly asked them to do something so much that they felt harassed or coerced into doing something against their will, whether someone close to them ever completely refused to talk to them or ignored them for days at a time, who committed the mistreatment, and whether it was reported to the police. Physical mistreatment was measured by asking respondents whether anyone has ever hit them with their hand or object, slapped them, or threatened them with a weapon, whether anyone ever tried to restrain them by holding them down, tying them up, or locking them in their room or house, whether anyone ever physically hurt them so bad that they suffered some degree of injury, including cuts, bruises, or other marks, who committed the mistreatment, and whether it was reported to the police. Sexual mistreatment was measured by asking respondents whether anyone has ever made them have sex or oral sex by using force or threatening to harm them or someone close to them, whether anyone has ever forced them to undress or expose themselves when they didn't want to, whether anyone has ever taken pictures of them with their clothes partially or completely taken off when they didn't want them to, who committed the mistreatment, and whether it was reported to the police. Financial exploitation was measured by asking respondents whether someone helps them take care of their finances, or makes decisions about their money and property, either with or without their approval, how this person is related to respondent, whether this person has ever been in trouble with the law, whether they ask for permission before deciding to spend their money or sell their property, whether they have ever forged their signature in order to sell their property or to get money from their accounts, whether the person has ever forced or tricked them into signing a document so that they

would be able to get some of their money or possessions, whether that person, or anyone else they are close to, has ever stolen their money or took their things for themselves, their friends, or to sell, and whether a stranger has ever spent their money or sold their property without their permission. Finally neglect was measured by asking respondents whether they need someone to help take care of them, how many people help care for them, and whether that person is reliable.

Response Rates: The American Association for Public Opinion Research (AAPOR) cooperation rate 3 was 69.1 percent for the sample and the response rate 3 was 47.8 percent.

Presence of Common Scales: Several Likert-type scales were used.

Extent of Processing: Standardized missing values.  
Checked for undocumented or out-of-range codes.

## Access and Availability

Note: A list of the data formats available for this study can be found in the [summary of holdings](#). Detailed file-level information (such as record length, case count, and variable count) is listed in the [file manifest](#).

Restrictions: The data are restricted from general dissemination. Users interested in obtaining these data must complete a Restricted Data Use Agreement form and specify the reasons for the request. A copy of the Restricted Data Use Agreement form can be requested by calling 800-999-0960. Researchers can also download this form as a Portable Document Format (PDF) file from the download page associated with this dataset. Completed forms should be returned to: Director, National Archive of Criminal Justice Data, Inter-university Consortium for Political and Social Research, Institute for Social Research, P.O. Box 1248, University of Michigan, Ann Arbor, MI 48106-1248, or by fax: 734-647-8200.

## Publications

Final Reports and Other Publication Resources: A list of publications related to, or based on, this data collection can be accessed from the study's download page on the NACJD Web site or through the ICPSR Bibliography of Data-Related Literature at

<http://www.icpsr.umich.edu/ICPSR/citations/index.html>. The list of citations includes links to abstracts and publications in Portable Document Format (PDF) files or text files when available.

Final reports and other publications describing research conducted on a variety of criminal justice topics are available from the National Criminal Justice Reference Service (NCJRS). NCJRS was established in 1972 by the National Institute of Justice (NIJ), an agency of the U.S. Department of Justice, to provide research findings to criminal justice professionals and researchers. NCJRS operates specialized clearinghouses that are staffed by information specialists who supply a range of reference, referral, and distribution services. Publications can be obtained from NCJRS at NIJ/NCJRS, Box 6000, Rockville, MD, 20849-6000, 800-851-3420 or 301-519-5500. TTY Service for the Hearing Impaired is 877-712-9279 (toll-free) or 301-947-8374 (local). The URL for the NCJRS Web site is:

<http://www.ncjrs.gov/>

## **NIJ Data Resources Program**

About the DRP: The National Institute of Justice Data Resources Program (DRP) makes datasets from NIJ-funded research and evaluation projects available to the research community and sponsors research and training activities devoted to secondary data analysis. Datasets are archived by the National Archive of Criminal Justice Data (NACJD) at the Inter-university Consortium for Political and Social Research (ICPSR) at the University of Michigan.

The NACJD maintains a World Wide Web site with instructions for transferring files and sending messages. Criminal justice data funded by the Department of Justice are available via the Internet at this site at no charge to the user. NACJD may be contacted at NACJD/ICPSR, P.O. Box 1248, Ann Arbor, MI, 48106-1248, 800-999-0960. The URL for the NACJD Web site is:

<http://www.icpsr.umich.edu/NACJD/>

## Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

**Table 1: Distribution of Variables by Percentage of Missing Values**

Variable Name and Label (Total Cases = 6590 )	Percent of Cases with Missing Values
6.5% ( 29 of 448 variables)	have 0% Missing Values
0.2% ( 1 of 448 variables)	have 0% - 1% Missing Values
1.1% ( 5 of 448 variables)	have 1% - 3% Missing Values
0.2% ( 1 of 448 variables)	have 3% - 5% Missing Values
8.3% ( 37 of 448 variables)	have 5% - 10% Missing Values
A1	A1. OVERALL, HOW WOULD YOU RATE YOUR HEALTH DURING THE PAST 4 WEEKS? WOULD YOU SAY IT HAS BEEN... 8.9%
A1B	INTERVIEWER: RECORD GENDER OF RESPONDENT. DO NOT ASK 8.2%
A2	A2. DURING THE PAST 4 WEEKS, HOW MUCH DID PHYSICAL HEALTH PROBLEMS LIMIT YOUR USUAL PHYSICAL ACTIVITIES (SUCH AS WALKING OR CLIMBING STAIRS)? (DO NOT READ - PROBE AS NEEDED: WOULD IT BE...) 9.4%
A3	A3. DURING THE PAST 4 WEEKS, HOW MUCH DIFFICULTY DID YOU HAVE DOING YOUR DAILY WORK, BOTH AT HOME AND AWAY FROM HOME, BECAUSE OF YOUR PHYSICAL HEALTH? (DO NOT READ - PROBE AS NEEDED: WOULD IT BE...) 9.5%
A4	A4. HOW MUCH BODILY PAIN HAVE YOU HAD DURING THE PAST 4 WEEKS? (DO NOT READ - PROBE AS NEEDED: WOULD IT BE...) 9.0%
A5	A5. DURING THE PAST 4 WEEKS, HOW MUCH ENERGY HAVE YOU HAD? (DO NOT READ - PROBE AS NEEDED: WOULD IT BE...) 9.4%
A6	A6. DURING THE PAST 4 WEEKS, HOW MUCH DID YOUR PHYSICAL HEALTH OR EMOTIONAL PROBLEMS LIMIT YOUR USUAL SOCIAL ACTIVITIES WITH FAMILY OR FRIENDS? (DO NOT READ - PROBE AS NEEDED: WOULD IT BE...) 9.0%
A7	A7. DURING THE PAST 4 WEEKS, HOW MUCH HAVE YOU BEEN BOTHERED BY EMOTIONAL PROBLEMS SUCH AS FEELING ANXIOUS, DEPRESSED OR IRRITABLE? (DO NOT READ - PROBE AS NEEDED: WOULD IT BE...) 8.9%
A8	A8. DURING THE PAST 4 WEEKS, HOW MUCH DID PERSONAL OR EMOTIONAL PROBLEMS KEEP YOU FROM DOING YOUR USUAL WORK, SCHOOL OR OTHER DAILY ACTIVITIES? (DO NOT READ - PROBE AS NEEDED: WOULD IT BE...) 9.0%
A9	A9. DURING YOUR LIFETIME, HAVE YOU EVER EXPERIENCED A SERIOUS ACCIDENT AT WORK, IN A CAR, OR SOMEWHERE 8.7%

**Table 1: Distribution of Variables by Percentage of Missing Values**

Variable Name and Label (Total Cases = 6590 )	Percent of Cases with Missing Values
A10	ELSE IN WHICH YOU THOUGHT YOU MIGHT BE SERIOUSLY INJURED OR KILLED? A10. DURING YOUR LIFETIME, HAVE YOU EVER EXPERIENCED A TORNADO, HURRICANE, FLOOD, MAJOR EARTHQUAKE, OR OTHER NATURAL DISASTER IN WHICH YOU THOUGHT YOU MIGHT BE SERIOUSLY INJURED OR KILLED? 8.5%
A11	A11. DURING YOUR LIFETIME, HAVE YOU EVER SEEN SOMEONE SERIOUSLY INJURED OR VIOLENTLY KILLED? 8.6%
A13	A13. DURING YOUR LIFETIME, HAVE YOU EVER EXPERIENCED ANY OTHER SITUATION IN WHICH YOU WERE PERMANENTLY PHYSICALLY HARMED OR HAD A LIFE THREATENING ILLNESS? 9.0%
A15_3	A15. IN THE PAST MONTH, HOW OFTEN WAS SOMEONE AVAILABLE TO... GET TOGETHER WITH YOU FOR RELAXATION (READ LIST ONCE - PROBE AS NEEDED) 9.2%
A15_5	A15. IN THE PAST MONTH, HOW OFTEN WAS SOMEONE AVAILABLE TO... LOVE YOU AND MAKE YOU FEEL WANTED (READ LIST ONCE - PROBE AS NEEDED) 9.4%
A17	A17. DO YOU NEED SOMEONE TO HELP YOU GET TO THE PLACES YOU NEED TO GO, FOR EXAMPLE DO YOU NEED SOMEONE TO DRIVE YOU TO THE GROCERY STORE, A PLACE OF WORSHIP, THE DOCTOR? 8.3%
A18	A18. DO YOU NEED SOMEONE TO MAKE SURE YOU HAVE ENOUGH FOOD, MEDICINES OR ANY OTHER THINGS YOU NEED IN YOUR HOUSE? 8.3%
A19	A19. DO YOU NEED SOMEONE TO HELP YOU WITH HOUSEHOLD THINGS, LIKE COOKING MEALS, HELPING YOU EAT, OR MAKING SURE YOU TAKE THE CORRECT MEDICINES EACH DAY? 8.3%
A20	A20. DO YOU NEED SOMEONE TO HELP YOU WITH HOUSE CLEANING OR YARD WORK? 8.4%
A21	A21. DO YOU NEED SOMEONE TO HELP YOU GET OUT OF BED, GET SHOWERED, OR GET DRESSED? 8.2%
A22	A22. DO YOU NEED SOMEONE TO MAKE SURE YOUR BILLS GET PAID? 8.3%
A24	A24. IS THERE SOMEONE WHO HELPS YOU TAKE CARE OF YOUR FINANCES, OR IS THERE SOMEONE OTHER THAN YOURSELF WHO MAKES DECISIONS ABOUT YOUR MONEY AND YOUR PROPERTY, EITHER WITH OR WITH OR WITHOUT YOUR APPROVAL? 8.9%
A34	A34. HAS A STRANGER EVER SPENT YOUR MONEY OR SOLD YOUR PROPERTY WITHOUT YOUR PERMISSION? 8.5%
A36	A36. HAS A STRANGER EVER FORGED YOUR SIGNATURE IN ORDER TO GET SOME OF YOUR MONEY OR SELL YOUR PROPERTY? 8.7%
A37	A37. HAS A STRANGER EVER FORCED OR TRICKED YOU INTO SIGNING A DOCUMENT SO THAT THEY WOULD BE ABLE TO GET SOME OF YOUR MONEY OR POSSESSIONS? 8.6%

**Table 1: Distribution of Variables by Percentage of Missing Values**

Variable Name and Label (Total Cases = 6590 )	Percent of Cases with Missing Values
A39 A39. HAS ANYONE EVER VERBALLY ATTACKED, SCOLDED, OR YELLED AT YOU SO THAT YOU FELT AFRAID FOR YOUR SAFETY, THREATENED OR INTIMIDATED?	8.5%
A40 A40. HAS ANYONE EVER MADE YOU FEEL HUMILIATED OR EMBARRASSED BY CALLING YOU NAMES SUCH AS STUPID, OR TELLING YOU THAT YOU OR YOUR OPINION WAS WORTHLESS?	8.8%
A41 A41. HAS ANYONE EVER FORCEFULLY OR REPEATEDLY ASKED YOU TO DO SOMETHING SO MUCH THAT YOU FELT HARASSED OR COERCED INTO DOING SOMETHING AGAINST YOUR WILL?	8.8%
A42 A42. HAS ANYONE CLOSE TO YOU EVER COMPLETELY REFUSED TO TALK TO YOU OR IGNORED YOU FOR DAYS AT A TIME, EVEN WHEN YOU WANTED TO TALK TO THEM?	8.7%
A55 A55. HAS ANYONE EVER HIT YOU WITH THEIR HAND OR OBJECT, SLAPPED YOU, OR THREATENED YOU WITH A WEAPON?	8.7%
A56 A56. HAS ANYONE EVER TRIED TO RESTRAIN YOU BY HOLDING YOU DOWN, TYING YOU UP, OR LOCKING YOU IN YOUR ROOM OR HOUSE?	8.5%
A57 A57. HAS ANYONE EVER PHYSICALLY HURT YOU SO THAT YOU SUFFERED SOME DEGREE OF INJURY, INCLUDING CUTS, BRUISES, OR OTHER MARKS?	8.6%
A70 A70. REGARDLESS OF HOW LONG AGO IT HAPPENED OR WHO MADE THE ADVANCES, HAS ANYONE EVER MADE YOU HAVE SEX OR ORAL SEX BY USING FORCE OR THREATENING TO HARM YOU OR SOMEONE CLOSE TO YOU?	9.6%
A71 A71. [+TXTA71+]	9.9%
A72 A72. [+TXTA72+]	9.8%
A73 A73. HAS ANYONE EVER TAKEN PICTURES OF YOU WITH YOUR CLOTHES PARTIALLY OR COMPLETELY TAKEN OFF WHEN YOU DIDN'T WANT THEM TO?	9.8%
D4 D4. HOW OLD ARE YOU? (NUMBER, 18 TO 97, 97=97+, 98=DON'T KNOW, 99=REFUSED)	10.0%
0.7% ( 3 of 448 variables)	have 10% - 20% Missing Values
A15_1 A15. IN THE PAST MONTH, HOW OFTEN WAS SOMEONE AVAILABLE TO... HELP YOU IF YOU WERE CONFINED TO BED (READ LIST ONCE - PROBE AS NEEDED)	13.2%
A15_2 A15. IN THE PAST MONTH, HOW OFTEN WAS SOMEONE AVAILABLE TO... GIVE YOU GOOD ADVICE ABOUT A CRISIS (READ LIST ONCE - PROBE AS NEEDED)	11.8%
A15_4 A15. IN THE PAST MONTH, HOW OFTEN WAS SOMEONE AVAILABLE TO... TALK TO ABOUT YOUR PROBLEMS (READ LIST ONCE - PROBE AS NEEDED)	10.4%
0.4% ( 2 of 448 variables)	have 20% - 40% Missing Values
S2 S2. MAY I SPEAK WITH THAT PERSON?	35.1%
