WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

PROCESSING NOTES FOR ICPSR #29581

Candidate Countries Eurobarometer 2003.5, November-December 2003: Identities and Values, Financial Services and Consumer Protection, and Time Use in the Countries Applying for European Union Membership

- 1) An issue with the 'SETTL' variable was found during ICPSR standard processing. The values for Turkey in this variable are exceptionally large (18 digits). Because SPSS and the other statistical software packages may not represent these values accurately ICPSR has set these values to system missing. No information has been provided by the data producer for this variable.

For researchers wishing to work with the 'SETTL' variable, a zipped package containing the original GESIS-submitted data (za4240.por) along with an ICPSR read me file (doc29581-0001_readme.txt) is being provided.

- 2) Q3/Q3_8A and Q3_8B, Q24A/Q24A, and Q24B/Q24B: A split ballot was used for one or more questions in this survey. The variable UNIQID (or variables ID and COUNTRY) along with the Basic Questionnaire can be used to identify the separate groups.
- 3) The documentation and/or setup files may contain references to Northern Cyprus, but Northern Cyprus was not a participant in this wave of Eurobarometer surveys. This collection contains no data for Northern Cyprus.
- 4) Some of the variables in this collection have a large amount of values. When tabulating these variables in Stata (Windows and Linux), an error message "too many values" appears.

To prevent this error message, the *tab1* command can be run using ranges of values specified after the *if* statement.

e.g., *tab1 VAR1 if VAR1 >0 & VAR1 <=45000*

tab1 VAR1 if VAR1 >45000 & VAR1 <=100000

In addition, the command *bigtab* can be used (e.g., *bigtab VAR1*), but in Windows only. It is available via download by typing the Stata command line *ssc install bigtab*. (*bigtab* Author: Paul H. Bern, Princeton University).

- 5) Comparable data in the framework of the Standard Eurobarometer series for the special modules on Value Orientations and Identities (Eurobarometer 60.1/ICPSR 3991), Financial Services (Eurobarometer 60.2/ICPSR 3992), and Time Use (Eurobarometer 60.3/ICPSR 3993).
- 6) The variable AGE corresponds with a different question number in the questionnaire than the variable name indicates. This variable AGE corresponds with question D.11 in the questionnaire.

- 7) For country-specific income categories, please refer to the “Income by Country” section of the ICPSR codebook.

WEIGHTING INFORMATION FOR ICPSR #29581

Candidate Countries Eurobarometer 2003.5, November-December 2003: Identities and Values, Financial Services and Consumer Protection, and Time Use in the Countries Applying for European Union Membership

WEIGHT1 (TECHVAR: WEIGHT COUNTRY):

Notes:

This weight variable is calculated for WITHIN country demographic distributions (to be applied in within country analyses and country comparisons).

WEIGHT2 (TECHVAR: WEIGHT CC13):

Notes:

This weight variable is calculated by weight 1 multiplied by the countries' weight in the population of the total region (to be applied in CC-13 analyses).

W_2004 (TECHVAR: WEIGHT MEMBER COUNTRIES):

Notes:

This weight variable adjusts each national sample in proportion to its nation's share in the total population of the countries, being European Union members in 2004. Turkey, Romania, and Bulgaria are excluded.

*For additional information on weighting, please refer to the "Technical Specifications" section of the ICPSR codebook.

Good morning / afternoon, I'm _____ from COMPANY. I would like to ask you to participate in a survey that is being conducted in the 13 countries that are applying for European Union membership, commissioned by the European Commission. In the questionnaire we will deal with three different issues, first I will ask your opinion regarding several values, then we will have few questions that regards financial services, and finally we will close with some questions about how people use their time. Please help me with your answers.

The questionnaire is anonymous; your responses will be used to generate statistics for our country. You can refuse to answer to any of the questions if you wish so.

C.3 Sample Specifications

Between the 20th of November and the 24th of December 2003, The Gallup Organization Hungary carried out wave 2003.5 of the Candidate Countries Eurobarometer, at the request of the European Commission, Directorate-General Education and Culture.

The Candidate Countries Eurobarometer 2003.5 covers citizens of each of the countries that are applying for European Union membership aged 15 and over, with the exception of Estonia, Latvia and Cyprus. In Estonia and Latvia, the survey covered permanent residents aged 15 and over. In Cyprus, the sample covered the territory of the Republic of Cyprus only. The basic sample design applied in all Candidate Countries is a multi-stage, random (probability) one. In each country, a number of sampling points were drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the Candidate Countries Region according to the EUROSTAT NUTS 2 (or equivalent; if there are no such regions, we used NUTS 3 or equivalent regions for sampling) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's home and in the appropriate national language. In countries with significant minorities the respondents had a chance to respond in their mother tongue (in Estonia, Latvia and Lithuania in Russian, and in Romania in Hungarian).

Turkey	KONSENSUS RESEARCH & CONSULTANCY	1000	4-Dec - 24-Dec	67,803
Total number of interviews		12082		172,748

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from population data from national statistics. For all Candidate Countries a weighting procedure, using marginal and intercellular weighting, was carried out, based on this Universe description. As such in all countries, gender, age, region NUTS 2, settlement size, household size, and education level were introduced in the iteration procedure. For international weighting (i.e. CC-13 averages), Gallup applies the official population figures as provided by national statistics. The total population figures for input in this post-weighting procedure are listed above.

The results of the Candidate Countries Eurobarometer studies are reported in the form of tables, datafiles and analyses. Per question a table of results is given with the full question text in English. The results are expressed as a percentage of the total. The results of the Eurobarometer surveys are analysed and made available through the Directorate-General Press and Communication, Opinion Polls of the European Commission, Office: Brey 7/41, B-1049 Brussels. The results are published on the Internet server of the European Commission: http://europa.eu.int/comm/public_opinion/. All Eurobarometer datafiles are stored at the "Zentral Archiv" (Universität Köln, Bachemer Strasse, 40, D-50869 Köln-Lindenthal), available through the CESSDA Database <http://www.nsd.uib.no/cessda/europe.html>. They are at the disposal of all institutes members of the European Consortium for Political Research (Essex), of the Inter-University Consortium for Political and Social Research (Michigan) and of all those interested in social science research.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits (in case of a sample of 1000 people – confidence intervals for N=500 sample are larger):

Observed percentages	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
Confidence intervals	± 1.9%	± 2.5%	± 2.7%	± 3.0%	± 3.2%
