#### **Information about Copyrighted Content**

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

#### NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

#### ICPSR CODEBOOK NOTES Offender Qualitative Interview Data

- Access to one or more files in this study is restricted. Users interested in obtaining these
  data must complete and sign a Restricted Data Use Agreement, describe the research
  project and data protection plan, and obtain IRB approval or notice of exemption for
  their research.
- 2) ICPSR created the case identifier CASEID "Case identifier created by ICPSR" and removed the original variable ID "Respondent ID".
- 3) Variables with decimals in the name had the decimal replaced with \_ , to prevent errors in SPSS.
- 4) Variables with values longer than 200 characters were split into two variables named the original variable name followed by A or B.
- 5) String variables that contained identifying information had that information removed and replaced with text in [brackets].

#### Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

ICPSR has an FAQ on copyright and survey instruments.
