Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR CODEBOOK NOTES
Police Chief Survey Data

- 1) To protect respondent privacy, certain identifying information is restricted from general dissemination. Specifically, some variables that facilitate the identification of police chiefs, data analysts, and/or law enforcement agencies are restricted from general dissemination. Users interested in obtaining these data must complete a Restricted Data Use Agreement form and specify the reasons for the request. A copy of the Restricted Data Use Agreement form can be requested by calling 800-999-0960. Researchers can also download this form as a Portable Document Format (PDF) file from the download page associated with this dataset.

Completed forms should be returned to: Director, National Archive of Criminal Justice Data, Inter-university Consortium for Political and Social Research, Institute for Social Research, P.O. Box 1248, University of Michigan, Ann Arbor, MI 48106-1248, or by fax: 734-647-8200.

- 2) ICPSR masked or edited some variables in the downloadable dataset to protect respondent confidentiality. The original content of these variables is available through our restricted access procedures (see note 1 above). The full list of masked variables that are only available through restricted access procedures is available as an appendix to this codebook.
- 3) ICPSR masked several variables in the restricted version of this dataset due to confidentiality concerns. Specifically, ICPSR masked the following variables in the restricted version of the Police Chief Survey Data:

V7 "NAME OF AGENCY"

V3 "COUNTY CODE"

V4 "CITY CODE"

V6 "AGENCY ID"

V8 "CITY NAME"

V12 "COUNTY NAME"

V17 "INTERNET SITE ADDRESS"

V19 "CENTRAL E-MAIL ADDRESS"

V22 "POSTAL STREET"

V23	“POSTAL CITY”
V24	“POSTAL STATE”
V25	“POSTAL ZIP”
ZIP1	“ZIP”
ZIP2	“SECONDARY ZIP”
V31	“TELEPHONE”
V33	“FAX NUMBER”

These variables are not available to secondary users of the data, even under restricted access procedures.

- 4) Due to confidentiality issues, ICPSR masked some values in the restricted dataset. Specifically, ICPSR masked the names of police agencies, states, counties, cities, and acronyms and other identifying information in the following variables in the dataset. Changed text in these variables is denoted by square brackets, []. This information is not available to secondary users of the data, even under restricted access procedures.

S11H “OTHER REASONS – SPECIFY”

S12B “IF YES, POSITION/JOB TITLE OF DEPARTMENT REPRESENTATIVE”

- 5) ICPSR anonymized agency names in the V6A “AGENCY IDENTIFIER” variable in the downloadable and restricted versions of both the Police Chief Survey Data (Part 1) and the Data Analyst Survey Data (Part 2). The same anonymization scheme was applied to the V6A variable in both Part 1 and Part 2 so that the chief data and analyst data can be linked using the anonymized agency identifier values.
- 6) ICPSR recoded blanks in numeric variables to -9 and labeled them Blank. The 9999, 999999, 99999999 missing codes and 88888, 88888888 inapplicable codes in the dataset were declared as missing values by ICPSR.
- 7) The data include variables that use a five-point Likert-type scale. Some respondents provided non-integer responses to these items, for which value labels were not assigned by the principal investigators nor were they assigned by ICPSR.

- 8) Users should be aware that the value label of “No fulltime personnel resp to calls” assigned to codes 494 and 523 in variable V74 (REGULARLY ASSIGNED DUTIES) was removed by ICPSR. In addition, the value label of 494 “No of fulltime sworn personnel assigned” in variable V77 (PATROL DUTIES) was also deleted by ICPSR.
- 9) Users should be aware that some value labels in the FLAG variables are truncated. Full value labels are not available for the FLAG variables.
- 10) For each original, valid value in the V7A variable and the FLAG variables, ICPSR prepended values to value labels in order to render the first 16 characters of each value label unique.
- 11) For some items in the Police Chief Survey, there are two corresponding variables in the data. The corresponding items in the data have identical variable labels and nearly identical variable names, except that one of the variables has “_2” appended to it. For example, the data contain a variable named S4A “WOULD USE CALLS FOR SERVICE” as well as a similar variable named S4A_2 “WOULD USE CALLS FOR SERVICE”.

While these variables have similar variable names and identical variable labels, users should be aware that the frequencies may differ between these variables. The principal investigators did not provide any documentation describing the differences between the quasi-duplicate variables in the data collection nor did they provide information about how these variables were created/coded.

- 12) ICPSR created the CASEID “CASE IDENTIFIER CREATED BY ICPSR” variable, which is a unique identifier.

ICPSR 32103

Survey of Police Chiefs' and Data Analysts' Use of Data in Police Departments in the United States, 2004

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
