## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

## ICPSR PROCESSING NOTES FOR # 32404-0039

*Historical Demographic Data of Southeastern Europe: Orasac, 1824-1975*  
*Tax Data, 1830*

- 1) **General note:** These data were collected over a period of about forty years through the ethnographic and archival field work of Joel M. Halpern in Southeastern Europe. Many datasets were compiled from Serbian state archives or through the courtesy of local officials in Orasac. Some of these data were collected and recorded by hand. These data have since been digitized and processed; nevertheless, some variables in some datasets contain miscodes, out of range values, missing value labels, and various other artifacts of the digitization process. ICPSR has worked to address these issues and record them in these processing notes while maintaining the integrity of Dr. Halpern's original research.

## Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

**Table 1: Distribution of Variables by Percentage of Missing Values--Tax Data, 1830**

<b>Variable Name and Label (Total Cases = 223 )</b>	<b>Percent of Cases with Missing Values</b>
100.0% ( 12 of 12 variables)	have 0% Missing Values
0.0% ( 0 of 12 variables)	have 0% - 1% Missing Values
0.0% ( 0 of 12 variables)	have 1% - 3% Missing Values
0.0% ( 0 of 12 variables)	have 3% - 5% Missing Values
0.0% ( 0 of 12 variables)	have 5% - 10% Missing Values
0.0% ( 0 of 12 variables)	have 10% - 20% Missing Values
0.0% ( 0 of 12 variables)	have 20% - 40% Missing Values
0.0% ( 0 of 12 variables)	have 40% - 99% Missing Values
0.0% ( 0 of 12 variables)	have 100% missing values

# **ICPSR 32404**

## **Historical Demographic Data of Southeastern Europe: Orasac, 1824-1975**

### **Variable Description and Frequencies**

**Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.**

**Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.**
