Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR Processing Notes

1. To protect respondent privacy, certain identifying information is restricted from general dissemination. Users interested in obtaining these data must complete a Restricted Data Use Agreement form and specify the reasons for the request. A copy of the Restricted Data Use Agreement form can be requested by calling 800-999-0960. Researchers can also download this form as a Portable Document Format (PDF) file from the download page associated with this dataset.

Completed forms should be returned to: Director, National Archive of Criminal Justice Data, Inter-university Consortium for Political and Social Research, Institute for Social Research, P.O. Box 1248, University of Michigan, Ann Arbor, MI 48106-1248, or by fax: 734-647-8200.

2. ICPSR recoded blanks in numeric variables to -9 and labeled them Blank. All declared missing codes other than -9 were assigned by the principal investigators in the original data file.

3. Users should be aware that this data collection may contain undocumented codes. These codes were not labeled by the principal investigator nor were they labeled by ICPSR.

4. Users should note the following differences between the Part 1 (Phase I Data) Restricted and Public files:

- 1) The variable COUNTY and STATE are masked in the Public file
- 2) The variables POPULAT, CCTPOF, CCPPOF, CCPPOI, CCPH, CTCTPOF, CTCPPPOF, CTCPPPOI, CTCPH, LACTPOF, LACPPOF, LACPPOI, and LACPH are collapsed in the Public file
- 3) The variable ID_NUM was created by ICPSR in the Public file. It replaced the variable ID which exists in the Restricted file.

5. Users should note the following difference between the Part 2 (Phase II Quantitative Data) Restricted and Public files:

- 1) The variables COUNTY and STATE are masked in the Public file
- 2) The variables POPULAT, HELPPO, and HELPOLEP are collapsed in the Public file.
- 3) The variable ID_NUM was created by ICPSR in the Public file. It replaced the variable ID which exists in the Restricted file.

6. For confidentiality reasons, several variables in Part 1 (Phase I Data) and Part 2 (Phase II Quantitative Data) had specific information masked. This includes information bracketed between "[" and "]". For example, the variable POFOTHER (6 PROTECTION ORDER FILINGS, OTHER) in the Part 1 (Phase I Data) data file includes the text "[CENTER]" which masks identifying data.

7. Because long character variables may cause errors in some versions of certain statistical software packages, ICPSR divided the following long character variable from Part 2 (Phase II Quantitative Data) into two variables:

POFOTHER was divided into:

- POFOTHERA (3. H PROTECTION ORDER FILINGS, OTHER, EXPLAIN - PART 1)
- POFOTHERB (3. H PROTECTION ORDER FILINGS, OTHER, EXPLAIN - PART 2)

National Survey of the Courts Capacity to Provide Protection Orders to Limited English Proficient (LEP) Battered Women, 2003-2006

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
