Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

Title Statement

Title: State Court Statistics, 2009

Identification No.: 34081

Responsibility Statement

Authoring Entity: National Center for State Courts

Production Statement

Producer: Inter-university Consortium for Political and Social Research

Place of Production: Ann Arbor, MI: Inter-university Consortium for Political and Social Research

Funding Agency: United States Department of Justice. Office of Justice Programs. Bureau of Justice Statistics. State Justice Institute.

Distribution Statement

Distributor: Inter-university Consortium for Political and Social Research (ICPSR), Institute for Social Research, University of Michigan

Series Statement

Series Name: State Court Statistics Series

Series Information: This data collection provides comparable measures of state appellate and trial court caseloads by type of case for the 50 states, the District of Columbia, and Puerto Rico. Court caseloads are tabulated according to generic reporting categories developed by the Court Statistics and Technology Committee of the Conference of State Court Administrators. These categories describe differences in the unit of count and the point of count when compiling each court's caseload. Major areas of investigation include: (1) case filings in state appellate and trial courts, (2) case dispositions in state appellate and trial courts, and (3) appellate opinions. Within each of these areas of investigation, cases are separated by main case type. Types include civil cases, capital punishment cases, other criminal cases, juvenile cases, administrative agency appeals, and several other types.

Study Scope

Subject Information

Keyword(s): appellate courts, caseloads, case processing, court cases, disposition (legal), legal appeals, state courts, statistical data, trial courts

Topic Classification(s): Social Institutions and Behavior, Crime and the Criminal Justice System, Court Case Processing

Abstract

The State Court Statistics Program provides comparable measures of state appellate and trial court caseloads by type of case for the 50 states, the District of Columbia, and Puerto Rico. Court caseloads are tabulated according to generic reporting categories developed by the Court Statistics Project Committee of the Conference of State Court Administrators. These categories describe differences in the unit of count and the point of count when compiling each court's caseload. Major areas of investigation include (1) case filings in state appellate and trial courts, (2) case processing and dispositions in state appellate and trial courts, and (3) appellate opinions. Within each of these areas of state government investigation, cases are separated by main case type, including civil cases, capital punishment cases, other criminal cases, domestic relations cases, juvenile cases, traffic violation cases, and administrative agency appeals.

Summary Data Description

Time Period: January 1, 2009 - December 31, 2009

Date(s) of Collection: 2009

Geographic Coverage: United States

Geographic Unit: State
Unit of Analysis: Courts

Universe: State appellate and trial court cases in the United States.

Kind of Data: Aggregate data

Notes

For additional information please see the Court Statistics Project Web site: http://www.ncsconline.org/d_research/csp/CSP_Main_Page.html Methodology and Processing

Data Collection Methodology

Data Collector: National Center for State Courts

Frequency of Data Collection: Annually

Sources Statement:

Data Source:: Published annual reports of administrative court offices and unpublished statistics provided by state administrative offices of the court and clerks of state appellate courts.

Characteristics of Data Collection Situation:

Information for the CSP's national caseload databases comes from published and unpublished sources supplied by state court administrators and appellate court clerks. Published data are typically taken from official state court annual reports and Web sites, so they take many forms and vary greatly in detail. Data from published sources are often supplemented by unpublished data received from the state courts in many formats, including internal management memoranda and computer-generated output. States also report and verify data electronically through spreadsheet templates provided by the Court Statistics Project.

The CSP data collection effort to build a comprehensive statistical profile of the work of state appellate and trial courts nationally is underway throughout the year. Extensive telephone contacts and follow-up correspondence are used to collect missing data, confirm the accuracy of available data, and determine the legal jurisdiction of each court. Information is also collected on the number of judges per court or court system (from annual reports, offices of state court administrators, and appellate court clerks), the state populations (based on United States Bureau of the Census revised estimates), and special characteristics regarding subject matter jurisdiction and court structure.

Notes

- 1. Beginning with the 2009 data, a new data part has been added, titled Appellate Court Data Grand Totals.
- 2. Beginning with the 2007 data, a new appellate framework was implemented. The appellate data is now contained in six separate files: Four Major Categories, Appeal by Right Caseloads, Appeal by Permission Caseloads, Death Penalty Caseloads, Original Proceeding/Other Appellate Matter Caseloads, and Grand Totals.

Each major category includes:

- a caseload summary to report incoming, outgoing, and pending caseloads;
- the manner of disposition to show how cases were disposed before the court;
- the type of court opinion to capture the extent to which the court elaborated on the merits of the case or the reasoning for its decision;
- the case outcome to describe how the court ruled in a case.
- 3. Beginning with the 2005 study, the Trial Court Data is contained in 6 separate files: Five Major Categories, Civil Caseloads, Domestic Relations Caseloads, Criminal Caseloads, Juvenile Caseloads, and Traffic Violations Caseloads.

4. Changes in Baseline Data Collection for the Court Statistics Project in Data Year 2003

As a result of the implementation of the State Court Guide to Statistical Reporting (Guide) by the National Center for State Courts' Court Statistics Project (CSP), the state trial court caseload data housed in the Inter-university Consortium for Political and Social Research (ICPSR) from prior to data year 2003 is generally not comparable to data submitted thereafter. The differences and distinctions outlined here are critical to the understanding of the current data collection, and users are strongly cautioned to note and understand the definitions of the new data elements.

The Caseload Summary - Status Categories

Previous categories:

- · Begin Pending
- Filed
- Disposed
- · End Pending

New categories:

- · Begin Pending Active
- · Begin Pending Inactive
- Newly Filed "Incoming"
- Reopened "Incoming"
- Reactivated "Incoming"
- · Entry of Judgment "Outgoing"
- Reopened Disposition "Outgoing"
- Placed on Inactive Status "Outgoing"
- · End Pending Active "Outgoing"
- · End Pending Inactive "Outgoing"

The first and most sweeping change brought about by the Guide is the introduction of several new "status categories" that affect all trial court case types. The State Court Model Statistical Dictionary, 1989, upon which previous data collections were based, recommended four status categories: begin pending, filed, disposed, and end pending. The Guide detailed and expanded these four categories to ten, and none of these ten new categories is truly comparable to any of the previous four.

Begin Pending caseloads are now divided into two discrete categories: Begin Pending - Active and Begin Pending - Inactive. This distinction allows courts to separate cases that are actively moving toward a disposition from those that are not, thereby permitting a more accurate and fair calculation of the age of the active pending caseload. These categories reflect the pending caseloads at the beginning of the reporting period.

Cases that were previously reported as filed can now be more accurately reported in one of three new categories: Newly Filed, Reopened, or Reactivated (collectively referred to as Incoming - see below). However, neither newly filed nor incoming is necessarily comparable with the formerly used filed category.

Similarly, cases that were previously reported as disposed can now be reported in one of three new categories: Entry of Judgment, Reopened Disposition, or Placed on Inactive Status (collectively referred to as Outgoing - see below). Again, neither entry of judgment nor outgoing is necessarily comparable to the formerly used disposed category.

End Pending caseloads are also divided into two discrete new categories: End Pending - Active and End Pending - Inactive. This distinction allows courts to separate cases that are actively moving toward a disposition from those that are not, thereby permitting a more accurate and fair calculation of the age of the active pending caseload. These categories are comparable to the begin pending categories but reflect the caseloads at the end of the reporting period.

As neither the CSP, nor most court systems, previously distinguished reopened and reactivated cases from newly filed cases, or reopened dispositions and cases placed on inactive status from entries of judgment, the five case type-specific datasets report only the aggregate categories of Incoming and Outgoing in association with individual case types. This is in an effort to produce some level of comparability with the former categories of Filed and Disposed.

New Case Types

Included in this expansion and revision of the data collected by the CSP was a substantial increase in the number of individual case types recommended for collection by state courts. Additionally, some case types that were previously collected became re-categorized under the Guide (e.g., domestic violence moved from domestic relations to criminal).

Variable Naming Conventions

ICPSR users should note that a variable naming convention is used throughout these datasets. The CSP continues to use a maximum of eight characters for variable names to help with backward compatibility. In the convention, the first four characters denote the case type and the second four indicate the status category. For example, the variable called "JDRGBPAC" refers to the Juvenile delinquency DRuG case type and the Begin Pending-ACtive status category.

Data Quality Footnotes

Each data element that expresses a court caseload value has associated with it a "quality footnote." These alphabetic codes indicate whether the associated numeric value is complete (denoted by the letter "A"), incomplete or overinclusive, and the extent to which it is incomplete or overinclusive (denoted by letters i, C, O, V, and X [see the data dictionary for definitions of these codes]), or missing (denoted by the letter "Z"). Each Z footnote accompanies a negative value. Negative one (-1) indicates that the court does not have jurisdiction over that particular case type and hence no caseload value is expected. Values of -2, -4, and -5 indicate that the court does have jurisdiction but is unable to report that particular data element because the data are unavailable, the data were not able to be distinguished and were therefore reported in the "other" category, or that the data were collapsed into another case type, respectively.

Data Access

Dataset Availability

Location: Inter-university Consortium for Political and Social Research

Extent of Collection: 12 data files + machine-readable documentation (PDF) + SAS setup files + SPSS setup files + Stata setup files + SAS supplemental syntax files + SAS transport files + SPSS system files + Stata system files.

Data Use Statement:

Citation Requirement: Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications.

Deposit Requirement: To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Visit the ICPSR Web site for more information on submitting citations.

Trial Court Data -- Domestic Relations Caseloads

Variable Description

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
