Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values--Creek 1910

Variable Name and Label (Total Cases = 2132)		Percent of Cases with Missing Values
29.2% (19 of 65 variables) have 0% Missing Values		
9.2% (6 of 65 variables) have 0% - 1% Missing Values		
3.1% (2 of 65 variables) have 1% - 3% Missing Values		
4.6% (3 of 65 variables) have 3% - 5% Missing Values		
4.6% (3 of 65 variables) have 5% - 10% Missing Values
