ICPSR PROCESSING NOTE FOR # 04117

*American Community Survey (ACS): Public Use Microdata Sample (PUMS),
2003*

- 1) **Variable frequencies:** The ICPSR generated codebook does not display frequencies for variables with over 200 unique values. These variables include **SERIALNO, FINCP, WGTP, HINCP, and SMOCP**. The integrity of the data has been maintained and full variable frequencies can be viewed in any of the available datasets for this study.
- 2) **Value labels:** Value labels were added to this study using the 2003 ACS Data Dictionary file.

Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values--Alabama Housing
