ICPSR CODEBOOK NOTES

- 1) The data are restricted from general dissemination. Users interested in obtaining these data must complete a Data Transfer Agreement Form and specify the reasons for the request. A copy of the Data Transfer Agreement Form can be requested by calling 800-999-0960. The Data Transfer Agreement Form is also available as a Portable Document Format (PDF) file from the NACJD Web site at <http://www.icpsr.umich.edu/NACJD/Private/private.pdf>. Completed forms should be returned to: Director, National Archive of Criminal Justice Data, Inter-university Consortium for Political and Social Research, Institute for Social Research, P.O. Box 1248, University of Michigan, Ann Arbor, MI 48106-1248, or by fax: 734-647-8200.
- 2) The instruments included in this data collection are not the original instruments used by the principal investigators for data collection. The instruments included were reconstructed by the principal investigators for use with this data collection after data collection and analysis were completed. The instruments included are based on the final database the principal investigators provided to ICPSR for processing.
- 3) ICPSR modified value labels where the first 16 characters were not unique. Original value labels were maintained and augmented with the value of that label and a colon preceding the value label.
- 4) ICPSR shortened variable labels to a maximum of 40 characters due to the character limitation for some statistical software and/or output.
- 5) In Part 1, ICPSR extended Q106 across two variables (Q106A and Q106B), each with the format of 200 characters to make it compatible with several statistical software packages.
- 6) In Part 1, to reduce the likelihood of disclosure of identities of individuals studied for this project, ICPSR modified the data in variables Q106A and Q106B where direct identifiers (such as names and addresses) and indirect identifiers (such as profession) were present. The changes are denoted with square brackets ([]).
- 7) In Part 2 of this data collection, ICPSR created the variable UNIQUEID as a unique, sequentially-assigned case identification number.
