Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

School History Data

A complete list of schools ever opened in western Chitwan was prepared using local and regional government records, interviews with residents, and interviews with former school employees, including schools that had closed by the time of data collection. During 1995 and 1996, school histories were collected from every school that had ever been located in the valley, even if it was no longer in operation. Measures were drawn from a combination of school records, interviews with school administrators, and interviews with teachers. For older schools in which none of the current staff knew the early history of the school, or schools that were no longer open, former administrators and teachers were located and interviewed in their homes. Global positioning system equipment was also used to gather the latitude and longitude of each school. Data were collected from 145 schools that ever existed in western Chitwan for the prior fifty years (see Axinn, Barber and Ghimire 1997 for data collection details).

School History Data

Data Set Name: schist.ssd01

Unit of observation: school

Number of observations: 145

Number of variables: 706

Unique identifier: schlid

Response rate: 100%

Data Format: sas for unix

Sample: *

Record length: 2,839

File structure: rectangular

Data collection: 1995 to 1996

Date: 09/08/2006
