Acknowledgement of Assistance

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR Data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for WORLD POPULATION 1955-1981: RECENT DEMOGRAPHIC ESTIMATES FOR THE COUNTRIES AND REGIONS OF THE WORLD were originally collected by the U.S. Department of Commerce, Bureau of the Census. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

STUDY DESCRIPTION

The Corporate Source Book is created annually from a stratified sample of the 1.5 to 1.8 million corporation income tax returns filed. The sample is stratified on the basis of total assets, net income or deficit, minor industry codes, and type of return. The records are arranged by minor industry codes, asset size class, and by net income/no net income. Sample rates range from 2 to 100 percent; increasing with asset size.

There are two records (one with net income and one without net income) for each of the asset size classes, for each of the minor industry codes. The more than 6000 records represent the averages for the 110,000 to 150,000 Corporate income tax returns sampled annually.

Since this file represents a sample of all returns and the data elements in the record represent averages for that industry and asset size class, anyone doing research based upon these records should review the IRS materials pertaining to the sampling variability which are published annually in Statistics of Income: Corporate Source Book.

The file contains 6396 records, each with a logical record length of 1197. Column locations and variable descriptions are contained in the multilithed documentation. Class IV.

WORLD POPULATION 1979 AND 1981 DATA FILES

International Demographic Data Center
Room 302, Scuderi Building
U.S. Bureau of the Census
Washington, D.C. 20233

The attached code book shows the data format for data from the following two publications of the U.S. Bureau of the Census:

WP-79 - World Population 1979-Recent Demographic Estimates for the Countries and Regions of the World. Washington, D.C. 1980.

WP-81 - Demographic Estimates for Countries With a Population of 10 Million or More: 1981. Washington, D.C. 1981.

Record 1 contains general information about the country including name, development status, and region codes. Records 2 to 5 contain data from WP-79, including vital rates for 1978 and population estimates for selected years from 1950 to 1979. Records 6 to 9 contain data from WP-81 including vital rates for 1981 and population estimates for selected years from 1950 to 1985. Data from WP-81 supercedes data from WP-79 and is only available for countries with a population of 10 million or more for midyear 1981.

All records are 80-bytes (columns) in length and contain the country code in columns 1 to 3 and the card number in columns 4 to 5.

Missing data in this file is indicated by a period in the appropriate field which is recognized as missing data by the Statistical Analysis System (SAS).
