DATA COLLECTION DESCRIPTION

Alfred Blumstein and Jacqueline Cohen

ADULT CRIMINAL CAREERS, MICHIGAN: 1974-1977 (ICPSR 8279)

SUMMARY: These data, taken from the computerized criminal history files of the Federal Bureau of Investigation, were collected to develop estimates of the extent and variation of individual offending. Included are the adult criminal records of individuals 17 years of age and older arrested in Michigan from 1974 to 1977. The primary criterion for inclusion in the sample was at least one arrest in Michigan for murder, rape, robbery, aggravated assault, burglary, or auto theft. Once sampled, the arrest history includes data on all recorded arrests through 1977, regardless of offense type. The full dataset includes records for 41,191 individuals for a total of 200,007 arrests. The dataset is organized by individual and includes demographic characteristics of the individual (birth date, state of birth, sex, and race) followed by information from the individual's arrest record in chronological order. The arrest records include the date of arrest, the offenses charged, the disposition (convicted, dismissed, or acquitted), and the sentence. Because the data are organized by individual, they are suitable for longitudinal analyses of individual offending patterns over time.

UNIVERSE: Adult criminal offenders in Michigan.

SAMPLING: Individuals with at least one arrest in Michigan for murder, rape, robbery, aggravated assault, burglary, or auto theft.

NOTE: In this hierarchical data file, there are two record types. Record 1 contains person record information, with 6 variables and 41,191 records. Record 2 provides arrest cycle information, with 52 variables and 200,007 records.

EXTENT OF COLLECTION: 1 data file + machine-readable documentation (text) + SAS data definition statements + SPSS data definition statements

EXTENT OF PROCESSING: SCAN/ UNDOCCHK.ICPSR/ MDATA.PR/ REFORM.DATA/ DDEF.ICPSR

DATA FORMAT: Logical Record Length with SAS and SPSS data definition statements
