## DATA COLLECTION DESCRIPTION

United States Department of Justice. National Institute of Justice  
DRUG USE FORECASTING IN 24 CITIES IN THE UNITED STATES,  
1987-1997 (ICPSR 9477)

SUMMARY: The Drug Use Forecasting (DUF) Program measures levels of and trends in drug use among persons arrested and booked in the United States. The data address the following topics: (1) types of drugs used by arrestees (based on self-reports and urinalysis), (2) self-reported dependency on drugs, (3) self-reported need for alcohol/drug treatment, (4) the relationship between drug use and certain types of offenses, and (5) the relationship between self-reported indicators of drug use and indicators of drug use based on urinalysis. Participation in the project is voluntary, and all information collected from the arrestees is anonymous and confidential. The data include the arrestee's age, race, gender, educational attainment, marital status, and the charge at the time of booking. The recently modified DUF interview instrument (used for part of the 1995 data and all of the 1996 and 1997 data) also collected information about the arrestee's use of 15 drugs, including recent and past use (e.g., 3-day and 30-day drug use) of each of these drugs, age at first use, and whether the arrestee had ever been dependent on drugs. In the original DUF interview instrument (used for the 1987 to 1994 data and part of the 1995 data), the information collected was the same as above except that the use of 22 drugs was queried, and the age at which the arrestee first became dependent on the drug was included. Arrestees also were questioned in the original instrument about their history of intravenous drug use, whether the consideration of AIDS influenced whether they shared needles, history of drug and alcohol treatment, their past and current drug treatment needs, and how many persons they had sex with during the past 12 months. Finally, arrestees were asked to provide a urine specimen, which was screened for the presence of ten drugs, including marijuana, opiates, cocaine, PCP, methadone, benzodiazepines (Valium), methaqualone, propoxyphene (Darvon), barbiturates, and amphetamines (positive test results for amphetamines were confirmed by gas chromatography). The Gun Addendum Data (Parts 27, 35, and 37) contain variables on topics such as arrestees' encounters with guns, whether they agreed or disagreed with statements about guns, gun possession, how they obtained handgun(s), whether they were armed with a gun at their arrest or during crimes, and if they had ever used a gun against another person. The Heroin Addendum Data, 1995 (Part 29) contains information that was formerly covered in the main annual file in 1992-1994, but in 1995 was revised and prepared as a separate dataset.

UNIVERSE: Booked arrestees in 24 sites in the United States.

SAMPLING: The data were collected from booked arrestees as follows. 1987 data: 2,993 males at 11 sites, 516 females at 5 sites. 1988 data: 10,554 males at 20 sites, 3,261 females at 14 sites. 1989 data: 16,186 males and 5,804 females at 21 sites. 1990 data: 20,556 males at 23 sites, 7,769 females at 21 sites. 1991 data: 22,335 adult males at 24 sites, 8,330 adult females at 21 sites. 1992 data: 22,265 adult males at 24 sites, 8,322 adult females at 21 sites. 1993 data: 20,551 adult males at 23 sites, 8,139 adult females at 21 sites. 1994 data: 20,015 adult males at 23 sites, 7,839 adult females at 21 sites, 4,558 juvenile males at 12 sites, 734 juvenile females at 8 sites. Part 1 Survey, 1995, data: 11,374 adult males at 23 sites, 4,474 adult females at 21 sites, 2,483 juvenile males at 12 sites, 412 juvenile females at 7 sites. Part 2 Survey, 1995, data: 9,364 adult males at 22 sites, 3,592 adult females at 20 sites, 1,810 juvenile males at 10 sites, 242 juvenile females at 5 sites. 1996 data: 19,835 adult males at 23 sites, 7,532 adult females at 21 sites, 4,145 juvenile males at 12 sites, 645 juvenile females at 7 sites. 1997 data: 19,736 adult males at 23 sites, 7,547 adult females at 21 sites, 3,686 juvenile males at 12 sites, 647 juvenile females at 8 sites.

NOTE: (1) SPSS export files are available for all data files except Parts 3 and 6. (2) The codebooks for the 1996 and 1997 data and the data collection instruments for 1994, 1995, 1996, and 1997 are provided as Portable Document Format (PDF) files. The PDF file format was developed by Adobe Systems Incorporated and can be accessed using PDF reader software, such as the Adobe Acrobat Reader. Information on how to obtain a copy of the Acrobat Reader is provided in the README file on the diskette version of this study for the years 1987-1995 and through the ICPSR Website on the Internet. (3) The data collection instruments for 1987-1993 are available only in hardcopy form upon request from ICPSR. (4) In response to recommendations by the Government Accounting Office (GAO), significant modifications were made to the DUF survey instrument midway through 1995, resulting in two different survey instruments used that year. The new survey instrument (1995 Survey, Part 2) retains many of the variables from the original DUF questionnaire (1995 Survey, Part 1), as well as adding more detailed questions. (5) In efforts to make the DUF data more "user friendly," the coding scheme and formatting of the 1994 data and 1995 Survey, Part 1, data were changed slightly from previous years and, further, the coding scheme and formatting of the 1995 Survey, Part 2, data differ somewhat from the 1994 and 1995 Survey, Part 1, data.

## CODEBOOK NOTES FOR 1997 DUF DATA

In response to recommendations by the General Accounting Office, the DUF survey instrument was modified in important ways in 1995. Many of the questions from the original DUF questionnaire were retained in the new survey instrument. However, the new DUF survey contains more detailed information about the race of arrestees interviewed in the DUF program, and the charges for which they have been booked. Also, in the new survey arrestees are asked about their previous arrest and incarceration history, whether they were under the influence and/or were in need of drugs during the commission of the crime for which they were arrested, and whether they have been a patient at a hospital emergency room. Finally, to add a spatial dimension to the DUF data, the new instrument includes the zipcode of the place in which the arrestee resides and the zipcode of the place in which the arrestee was arrested. However, at the request of the DUF Office, ICPSR blanked these variables for reasons of confidentiality.

First, in the 1997 datafile all "yes" responses are coded as "1" and all "no" responses are coded as "0". Also, in the 1997 datafile, "77" refers only to instances in which questions were not applicable (i.e., the question was not asked) and is labeled, "NA/SKIP". In the DUF data questions may be not applicable or skipped for two reasons. First, some questions are posed only to adult arrestees. For these questions, records for all juveniles are coded "77" because they are not applicable to juveniles. Alternatively, some questions are posed only to juvenile arrestees. For these questions records for all adults are coded "77" because they are not applicable to adults. Variables only applicable to adults or juveniles are labeled accordingly (e.g., "JUVENILE ONLY", "ADULT ONLY"). Second, there are several conditional skip patterns in the DUF survey. For example, all arrestees are asked whether they have ever used alcohol, but only those who respond yes to this question are asked subsequent questions about their use of alcohol (e.g., age at first use, 12-month, 30-day, and 3-day use, etc.). Arrestees who report that they have never used alcohol are not asked subsequent questions about alcohol use; thus, these questions are not applicable to them and a code of "77" is assigned and labeled "NA/SKIP". Users should consult the DUF questionnaire for more information about conditional skip patterns. If data were not obtained for a core question, all missing values for the subsequent questions were also recoded to "77".

In the 1997 datafile "99" is used as the code for data not obtained by interviewers when it should have been obtained. The exceptions to this rule are the following three variables: LEGAL, ILLEGAL, and DRGMONEY. Because "99" is a valid response for these questions it is not used as the code for "data not obtained" for these variables. Instead, the code for "data not obtained" for LEGAL, ILLEGAL, and DRGMONEY is "999999999".

Finally, in the 1997 datafile the values "77" and "99" are specified as missing values because these cases should not be included in computation of statistics using the DUF data. Published DUF statistics were produced with these cases declared missing.

Some values in five character variables, HSGDOTHR, NOSCHOTH, LIVEOTH, FTTYPE, and PTTYPE, were edited by ICPSR for confidentiality reasons. Changes to the responses are enclosed within square brackets "[ ]".
