ICPSR PROCESSING NOTE FOR # 09836-0007

Chinese Household Income Project, 1988

- 1) Value Labels: In the original documentation the variables V106, V107, V108, V109, V110 value labels are classified as 1 for "Yes" and 2 for "No". ICPSR processing found the actual values are 1 for "Yes" and 0 for "no".
- 2) Variables: In the primary investigator's codebook variables V227I, V228I, V229I, V230I, 231I, 232I, 233I, 234I, 235I, and 236I are labeled as Item Received, and also as no use. ICPSR Processing found frequencies for these variables, but no indication on what the frequencies mean.
- 3) Due to limitations with Stata variables V201-V207C, V213, and V214 missing values are not coded and labeled.

Chinese Household Income Project, 1988 Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
