Terms of Use

The terms of use for this study can be found at:
http://www.icpsr.umich.edu/cocoon/ICPSR/TERMS/26830.xml

Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.
ICPSR PROCESSING NOTES FOR # 26830
CBS News Monthly Poll and Call-Back Poll, November 2008

1) **Variable format:** The CASEID variable was reformatted in order to make it a unique identifier.

2) **Corrected value labels:** A truncated value label in variable EDUC was corrected.

3) **Confidentiality:** Responses in the variable Q103 (ZIP Code) were blanked to protect respondent confidentiality.

4) **Call-back poll questions:** This data collection includes responses to questions from the original poll as well as to the call-back poll. Original survey questions are identified with the prefix "Q", while call-back questions are identified as "RQ".
Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.
CASEID
caseid

Location: 1-5(width: 5; decimal: 0)
Variable Type: numeric (ISO)

- Mean: 28614.26
- Minimum: 626.00
- Maximum: 99941.00
- Standard Deviation: 19392.16

Based upon 1220 valid cases out of 1220 total cases.

WHO

Total Adults in Household

Location: 6-6(width: 1; decimal: 0)
Variable Type: numeric (ISO)

<table>
<thead>
<tr>
<th>WHO: Total Adults in Household</th>

Some people say that since the 1960s there has been a lot of real progress in getting rid of racial discrimination against Blacks. Others say that there hasn't been much real progress for Blacks over
that time. Which do you agree with more? Would you say there's been a lot of real progress getting rid of racial discrimination or hasn't there been much real progress?

</tbody>
</table>

- Mean: 1.70
- Median: 1.00
- Mode: 1.00
- Minimum: 1.00
- Maximum: 9.00
- Standard Deviation: 1.01

Based upon 872 valid cases out of 1220 total cases.
The codes listed in the appendix provide the complete listing of states (including the District of Columbia) composing the Census Region and CBS Region (variables CENR and CBSR, respectively, in the codebook), as well as the state codes composing the CBS State Code (variable STCD in the codebook).

Census region codes parallel CBS region codes with one exception: Delaware, District of Columbia, Maryland, and West Virginia are coded as South, not Northeast.

Additionally, a description of weight variables from the original documentation is also included. Due to the reformatting of the data file, the column locations of these variables are no longer valid.
