Secondary Data Analysis and the National Addiction and HIV Data Archive Program (NAHDAP)

Date: June 22-24, 2015
Location: Ann Arbor, MI
Sponsor: National Institute on Drug Abuse

Instructors
Lisa Dierker, Wesleyan University

Prerequisites
Substantive interest in addiction and/or HIV.

About the Course
This three-day workshop supports participants in planning and conducting secondary data analysis using datasets from NAHDAP. Sessions will include:

- Brief presentations focused on the nuts and bolts of secondary data analysis
- Hands-on workshop sessions
- One-on-one consultation for conducting your own research
- Consideration of study design, measurement, data management decisions
- Selection and use of different analytic tools
- Best practices in written presentation of results for publication
- Available funding opportunities for secondary data analysis projects

Each participant’s experience in the workshop will be individualized to her/his own interests, background, and needs. Both SAS and R software will be supported and early career participants are especially encouraged to apply. The workshop can be used to develop a project based on data from NAHDAP or to make progress on a project already underway.

To apply
Enrollment is limited to 25 participants. Apply using the Summer Program portal to provide your information, select the course, and complete the section on your quantitative/analytic goals (including the products you hope to generate). Also, upload a current curriculum vita and cover letter summarizing research interests and experiences. Please also indicate in your cover letter if you use SAS or R, or have no preference. The deadline to apply is May 3, 2015. There are no tuition fees for accepted participants.
